2-pentyl pyridine
formation of 2-pentyl pyridine during processing of soybean protein isolates as affected by ph 852
precursors for formation of 2-pentyl pyridine in processing of soybean protein isolates 1155
35S promoter
detection of residues of genetically modified soybeans in breaded fried turkey cutlets 604
9 fluorenylmethylchloroformate
HPLC determination of amino acids in musts and port wine using OPA/FMOC derivatives 1130
α-tocopherol
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
antioxidant activity of whey in a salmon oil emulsion 1325
A. bisporus
textural changes in mushrooms (*Agaricus bisporus*) associated with tissue ultrastructure and composition 1404
***accinium corymbosum* L.**
changes in anthocyanins and polyphenolics during juice processing of highbush blueberries (*Vaccinium corymbosum* l.) 357
acclimation
optimum postmortem chilled storage temperature for summer and winter acclimated, rested, chinook salmon (*Oncorhynchus tshawytscha*) white muscle 750
acetaldehyde and ethanol
changes in the quality of fresh-cut jicama in relation to storage temperatures and controlled atmospheres 1238
acetic
diffusion of acetic and propionic acids from chitosan-based antimicrobial packaging films 768
action limit
organochlorines, organophosphates, and pyrethroids in channel catfish, rainbow trout, and red swamp crayfish from aquaculture facilities 231
activation energy
Degradation Kinetics of (-)-Epigallocatechin Gallate as a Function of pH and Dissolved Oxygen in a Liquid Model System 753
actomyosin
porcine plasma proteins as a surimi protease inhibitor: effects on actomyosin gelation 607
acylation
acylation and solubility of casein precipitated by carbon dioxide 227
aerobic counts
prevalence of salmonellae on beef products at butcheries and their antibiotic resistance profiles 880
aggregates
thermal aggregation of whey proteins in model solutions as affected by casein/whey protein ratios 776
aggregation
fish myosin aggregation as affected by freezing and initial physical state—556
albumen
functional properties of milk-egg mixtures 787
alfalfa sprouts
survival and growth of *Vibrio cholerae O1, Salmonella typhi, and Escherichia coli* O157:H7 in alfalfa sprout 162
alginate
physicochemical properties of frozen red hake (*Urophycis chuss*) mince as affected by cryoprotective ingredients .. 1117
alkaline phosphatase
combined pressure–temperature inactivation of alkaline phosphatase in bovine milk: a kinetic study 155
aluminum
aluminum content in foods and beverages consumed in the Spanish diet 206
the binding of H_2O_2-generated Fe(III) to *Bifidobacterium thermophilum* depends on the method of its production 1028
Amaranthus
Amaranthus betacyanin pigments applied in model food systems 869
production and properties of spray-dried Amaranthus betacyanin pigments 1248
amino acids
changes in the amino acid composition of green olive brine due to fermentation by pure culture of bacteria 1022
HPLC determination of amino acids in musts and port wine using OPA/FMOC derivatives 1130
precursors for formation of 2-pentyl pyridine in processing of soybean protein isolates 1155
aminopeptidases
debittering of a tryptic digest of bovine β-casein using porcine kidney general aminopeptidase and x-prolydipeptidyl aminopeptidase from *Lactococcus lactis* ssp. cremoris AM2 1145
ammonia
precursors for formation of 2-pentyl pyridine in processing of soybean protein isolates 1155
amorphous
sorption isotherm and calorimetric behavior of amorphous/crystalline raffinose-water systems 646
amylose content
differences in hollow volumes in cooked rice grains with various amylose contents as determined by NMR micro imaging 408
angiotensin I-converting enzyme inhibitor
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins 564
anhydride
acylation and solubility of casein precipitated by carbon dioxide 227
ANN
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
anthocyanins
changes in anthocyanins and polyphenolics during juice processing of highbush blueberries (*Vaccinium corymbosum* l.) 357
influence of carotenoids and pulps on the color modification of blood orange juice 458
modified atmosphere packaging of pomegranate 1112
antibiotic resistance
prevalence of salmonellae on beef products at butcheries and their antibiotic resistance profiles 880
anticarcinogen
conjugated linoleic acid content of Cheddar-type cheeses as affected by processing 874
antifungal
antimicrobial efficacy of a peroxyacetic/octanoic acid mixture in fresh-cut-vegetable process waters 1376
antimicrobial
antimicrobial efficacy of a peroxyacetic/octanoic acid mixture in fresh-cut-vegetable process waters 1376
antioxidants
the effects of antioxidants on browning and on degradation products caused by dehydroascorbic acid 20
degradation of lycopene, α-carotene, and β-carotene during lipid peroxidation 71
antioxidant activity of nontocopherol hazelnut (*Corylus* spp.) phenolics 276
bioactive properties of wild blueberry fruits 352
anthocyanins, phenolics, and antioxidant capacity of processed lowbush blueberry products 390
chemical and functional properties of oxidatively modified beef heart surimi stored at 2 °C 428
effects of antioxidants and packaging on lipid and cholesterol oxidation and color changes of irradiated egg yolk powder 625
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions 1060
stability of washed frozen mince from channel catfish frames 1083
residues of ethoxyquin and ethoxyquin dimer in ocean-farmed salmonids determined by high-pressure liquid chromatography 1312
antiplasticization
plasticizing–antiplasticizing effects of water on physical properties of tapioca starch films in the glassy state 445
APM
the effect of caramel coloring on the multiple degradation pathways of aspartame 1100
apple juice
optimizing apple juice extraction in multiple presses 461
apple juice, clear
apple cultivar and maturity affect haze-active protein and haze-active polyphenol concentrations in juice 1386
apple juice, cloudy
effect of cloud particle characteristics on the viscosity of cloudy apple juice .. 641
apple variety
apple cultivar and maturity affect haze-active protein and haze-active polyphenol concentrations in juice 1386
apples
apple wraps: a novel method to improve the quality and extend the shelf life of fresh-cut apples 480
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
aquaculture
organochlorines, organophosphates, and pyrethroids in channel catfish, rainbow trout, and red swamp crayfish from aquaculture facilities 231
ascorbic acid
the effects of antioxidants on browning and on degradation products caused by dehydroascorbic acid 20
in vitro digestion/caco-2 cell culture model to determine optimal ascorbic acid to FE ratio in rice cereal 925
β-carotene and ascorbic acid retention in fresh and processed vegetables 929

aseptic processing
an ultrasonic method for assessing the residence time distribution of particulate foods during ohmic heating ... 1180
aspartame
effect of aspartame and fat on sweetness perception in yogurt ... 1056
Atlantic menhaden
purification and characterization of proteinase from Atlantic menhaden muscle ... 772
ATP
early postmortem detection of exudative pork meat based on nucleotide content 413
ATPase activity
fish myosin aggregation as affected by freezing and initial physical state—556
autofluorescence
nondestructive assessment of lipid oxidation in minced poultry meat by autofluorescence spectroscopy ... 87
avocado
kinetic study of antibrowning agents and pressure inactivation of avocado polyphenoloxidase ... 823
Avrami
crystallization kinetics of amorphous lactose as a function of moisture content using isothermal differential scanning calorimetry ... 324
β-carotene
β-carotene and ascorbic acid retention in fresh and processed vegetables ... 929
β-CN (f193-209) peptide
hydrolysis of β-casein (193-209) fragment by whole cells and fractions of *Lactobacillus casei* and *Lactococcus lactis* ... *899*
β-cyclodextrin
effects of fractionation and the refining process of lard on cholesterol removal by β-cyclodextrin ... 622
β-glucosidase
enrichment of genistein in soy protein concentrate with hydrocolloids and β-glucosidase ... 591
bacteria
thermal inactivation kinetics of *Salmonella* and *Listeria* in ground chicken breast meat and liquid medium ... 706
bacterial contamination
microbial flora associated with Louisiana processed frozen and fresh nutria (*Myocastor coypus*) carcasses ... 1041
baking
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes ... 808
banana
moisture diffusion and desorption isotherms for banana ... 651
solar drying of bananas: mathematical model, laboratory simulation, and field data compared ... 990
barley, hull-less
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
batter
influences of gums, soy protein isolate, and heating temperatures on reduced-fat meat batters in a model system .. 48
rheological characterization of rice flour-based batters ... 1194
beef
differentiation of beef and kangaroo meat by visible/near-infrared reflectance spectroscopy ... 814
oxidative stability and sensory attributes of prerigor cooked beef steak 1382
beef batters
formulation protocol and dicationic salts affect protein functionality of model system beef batters ... 1151
beef, ground
thawing prior to cooking affects sensory, shear force, and cooking properties of beef patties ... 2
moisture loss and lipid oxidation for precooked beef patties stored in edible coatings and films ... 300
factors affecting premature browning during cooking of store-purchased ground beef ... 585
sensory, shear, and cooking properties of lower-fat beef patties made with inner pea fiber ... 805
color and heat denaturation of myoglobin forms in ground beef ... 847
beef heart
chemical and functional properties of oxidatively modified beef heart surimi stored at 2 °C ... 428
functionality changes in oxidatively/antioxidatively washed beef-heart surimi during frozen storage ... 796
beef soup
incorporation of histidine and β-alanine into the macromolecular fraction of beef soup stock during heating ... 596
beer
high hydrostatic pressure treatments for beer stabilization ... 974
betacyanins
production and properties of spray-dried Amaranthus betacyanin pigments ... 1248
Amaranthus betacyanin pigments applied in model food systems ... 869
beverage
Amaranthus betacyanin pigments applied in model food systems ... 869
β-galactosidase
stability and activity of β-galactosidase in sonicated cultures of *Lactobacillus delbrueckii* ssp. Bulgaricus as affected by temperature and ionic environments ... 1364
β-glucosidase
evaluation of genistin and genistein contents in soybean varieties and soy protein concentrate prepared with 3 basic methods ... 399
enrichment of genistein in soy protein concentrate with β-glucosidase ... 403
bifidobacteria
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin ... 884
the binding of H_2O_2-generated Fe(III) to *Bifidobacterium thermophilum* depends on the method of its production 1028
binding capacities
correlation between physicochemical characteristics and binding capacities of chitosan products ... 1134
binding sites
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study ... 997
biogenic amine
biogenic amines in Turkish sausages (sucuks) ... 764
changes in biogenic amine content of tokaj grapes, wines, and aszu-wines 1142
biosensor
a fluorescent lectin test for mold in raw tomato juice ... 346
bipolar membrane
comparison of electrochemical and chemical acidification of skim milk 1303
bitterness
hydrolysis of β-casein (193-209) fragment by whole cells and fractions of *Lactobacillus casei* and *Lactococcus lactis* ... *899*
black skipjack
postmortem changes in black skipjack muscle during storage in ice ... 774
blanching
blanch time and cultivar effects on quality of frozen and stored corn and broccoli ... 534
influence of blanching-osmotic dehydration treatments on volatile fraction of strawberries ... 1107
reduction of microflora of whole pickling cucumbers by blanching ... 1354
blood plasma
effect of high pressure processing at different temperatures on protein functionality of porcine blood plasma— 486
blueberries
bioactive properties of wild blueberry fruits ... 352
changes in anthocyanins and polyphenolics during juice processing of highbush blueberries (*Vaccinium corymbosum* l.) ... 357
anthocyanins, phenolics, and antioxidant capacity of processed lowbush blueberry products ... 390
bonito
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins ... 564
Botrytis cinerea
changes in biogenic amine content of tokaj grapes, wines, and aszu-wines 1142
bovine β-lactoglobulin
involvement of disulfide bonds in bovine β-lactoglobulin b gels set thermally at various pH ... 384
bovine milk immuno-globulin G
thermal stability of bovine milk immunoglobulin g (igg) and the effect of added thermal protectants on the stability ... 188
bovine serum albumin
interaction of low molecular weight phenolics with proteins (BSA) ... 617
the contribution of water to the specific heat change at the glass-to-rubber transition of the ternary system BSA-water-NaCl ... 1187
broccoli
blanch time and cultivar effects on quality of frozen and stored corn and broccoli ... 534
β-carotene and ascorbic acid retention in fresh and processed vegetables ... 929
brown pigment
decolorization of brown pigments in foods by immobilized mycelia of *Coriolus versicolor* IFO 30340 and *Paecilomyces canadensis* NC-1 ... 870
browning
the effects of antioxidants on browning and on degradation products caused by dehydroascorbic acid ... 20
quality changes in fresh-cut pear slices as affected by cultivar, ripeness stage, fruit size, and storage regime ... 541
decolorization of brown pigments in foods by immobilized mycelia of *Coriolus versicolor* IFO 30340 and *Paecilomyces canadensis* NC-1 ... 870
rhubarb juice as a natural antibrowning

agent 1288
Ca^{2+}-ATPase activity
pressure-induced denaturation of muscle proteins and its prevention by sugars and polyols 818
Caco-2
in vitro digestion/caco-2 cell culture model to determine optimal ascorbic acid to FE ratio in rice cereal 925
caffeic acid
optimization of simulated ripe olive darkening in presence of manganese 254
cake
relative effects of ingredients on cake staling based on an accelerated shelf-life test 937
caking
study of caking in powdered foods using nuclear magnetic resonance spectroscopy 134
calcium bioavailiability
calcium absorption in rats consuming olive oil or sunflower oil unused or used in frying 892
calpains
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786
partial purification and characterization of chinook salmon (*Oncorhynchus tshawytscha*) calpains and an evaluation of their role in postmortem proteolysis 1318
cancer preventives
bioactive properties of wild blueberry fruits 352
caprine cheese
contribution of *Lactococcus lactis* ssp. lactis IFPL 359 and *Lactobacillus casei* ssp. casei IFPL 731 to the proteolysis of caprine curd slurries 711
caramel coloring
the effect of caramel coloring on the multiple degradation pathways of aspartame 1100
carbohydrates
production of kefir from soymilk with or without added glucose, lactose, or sucrose 716
carbon dioxide
acylation and solubility of casein precipitated by carbon dioxide 227
exogenous polyamines and gibberellic acid effects on peach (*Prunus persica* l.) storability improvement 288
cardioprotective compounds
bioactive properties of wild blueberry fruits 352
carnosine
incorporation of histidine and β-alanine into the macromolecular fraction of beef soup stock during heating 596
carotenoids
degradation of lycopene, α-carotene, and β-carotene during lipid peroxidation 71
influence of carotenoids and pulps on the color modification of blood orange juice 458
carrageenan
influences of gums, soy protein isolate, and heating temperatures on reduced-fat meat batters in a model system .. 48
effects of cation properties on sol-gel transition and gel properties of κ-carrageenan 1332
carrots
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
quality of shredded carrots as affected by packaging film and storage temperature 726
β-carotene and ascorbic acid retention in fresh and processed vegetables 929
casein
acylation and solubility of casein precipitated by carbon dioxide 227
ability of various dairy proteins to reduce pink color development in cooked ground turkey breast 417
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations 421
thermal aggregation of whey proteins in model solutions as affected by casein/whey protein ratios 776
the emulsifying properties of commercial milk protein products in simple oil-in-water emulsions and in a model food system 934
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study 997
comparison of electrochemical and chemical acidification of skim milk 1303
casein hydrolysates
debittering of a tryptic digest of bovine β-casein using porcine kidney general aminopeptidase and x-prolydipeptidyl aminopeptidase from *Lactococcus lactis* ssp. cremoris AM2 1145
caseinate
ability of various dairy proteins to reduce pink color development in cooked ground turkey breast 417
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations 421
caseinate hydrolysate
purification of glycomacropeptide from caseinate hydrolysate by gel chromatography and treatment with acidic solution 588
Casson model
flow characterization of peach products during extrusion 471
celery
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
cell association
short chain fatty acids alter HEP-2 cell association and invasion by stationary growth phase *Salmonella typhimurium* 1206
cell culture
evaluation of mass transfer mechanisms during osmotic treatment of plant materials 1016
cell wall
textural changes in mushrooms (*Agaricus bisporus*) associated with tissue ultrastructure and composition 1404
cell-wall polysaccharides
polysaccharide constituents of coffee-bean mucilage 1308
cellulose
fermentation of *Monascus purpureus* on bacterial cellulose-nata and the color stability of *Monascus*-nata complex 342
cellulose derivatives
decreasing oil uptake of doughnuts during deep-fat frying using curdlan ... 883
cereal
fumonisin B_1 production and growth of *Fusarium moniliforme* and *Fusarium proliferatum* on maize, wheat, and barley grain 921
in vitro digestion/caco-2 cell culture model to determine optimal ascorbic acid to FE ratio in rice cereal 925
cheese
conjugated linoleic acid content of Cheddar-type cheeses as affected by processing 874
predicting the cutting time of coagulating milk for cheese production using a heated thermistor 879
comparison of cheeses made from milk having normal and high oleic fatty acid compositions 920
sensory and compositional relationships between commercial Cheddar-flavored enzyme-modified cheeses and natural Cheddar 1076
instrumental and expert assessment of mahon cheese texture 1170
cheese characterization
texture assessment of French cheese 168
cheese, goat
high hydrostatic pressure for accelerating ripening of goat's milk cheese: proteolysis and texture 636
ripening profiles of goat cheese produced from milk treated with high pressure 833
cheese, processed
effects of ingredients on the functionality of fat-free process cheese spreads 822
cheese ripening
hydrolysis of β-casein (193-209) fragment by whole cells and fractions of *Lactobacillus casei* and *Lactococcus lactis* 899
cheese whey
effect of cottage cheese whey pretreatment and 2-phase crossflow microfiltration/ultrafiltration on permeate flux and composition 334
chemical acidification
comparison of electrochemical and chemical acidification of skim milk 1303
chemical bonds
involvement of disulfide bonds in bovine β-lactoglobulin b gels set thermally at various pH 384
chicken
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins 564
^{1}h NMR studies of water in chicken breast marinated with different phosphates 575
chicken fat
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases 826
chicken meat
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
chilled
quality index method developed for raw gilthead seabream (*Sparus aurata*) 1202
chitosan
diffusion of acetic and propionic acids from chitosan-based antimicrobial packaging films 768
correlation between physicochemical characteristics and binding capacities of chitosan products 1134
water vapor transmission rates and sorption behavior of chitosan films 1175
chlorine
chlorine generation and disinfection by electroflotation 834
chlorogenic acid

reactions of chlorogenic acid with lysozyme: physicochemical characterization and proteolytic digestion of the derivatives 1091
chlorophyll degradation
degradation kinetics of chlorophyll in peas as a function of pH 1296
cholesterol
effects of fractionation and the refining process of lard on cholesterol removal by β-cyclodextrin 622
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897
supplementation of energy-restricted diets with coconut oil improves nitrogen balance without elevation of blood cholesterol levels 1066
Citrus sinensis
nondestructive methods to evaluate maturity level of oranges 365
classification
differentiation of beef and kangaroo meat by visible/near-infrared reflectance spectroscopy 814
Clostridium botulinum
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
inoculum size of *Clostridium botulinum* 56A spores influences time-to-detection and percent growth-positive samples 1369
coagulation
predicting the cutting time of coagulating milk for cheese production using a heated thermistor 879
coffee beans
pore structure of coffee beans affected by roasting conditions 452
polysaccharide constituents of coffee-bean mucilage 1308
coffee whitener
the emulsifying properties of commercial milk protein products in simple oil-in-water emulsions and in a model food system 934
cohesiveness
texture changes associated with insolubilization of sarcoplasmic proteins during salt-vinegar curing of fish 804
cold denaturation
protein denaturation and structural damage during high-pressure-shift freezing of porcine and bovine muscle 1002
cold-setting
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
coliforms
prevalence of salmonellae on beef products at butcheries and their antibiotic resistance profiles 880
collagen
extracting conditions for megrim (*Lepidorhombus boscii*) skin collagen affect functional properties of the resulting gelatin 434
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
color
microbiological and color quality changes of channel catfish frame mince during chilled and frozen storage 151
nondestructive methods to evaluate maturity level of oranges 365
influence of carotenoids and pulps on the color modification of blood orange juice 458
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
effects of antioxidants and packaging on lipid and cholesterol oxidation and color changes of irradiated egg yolk powder 625
irradiation in contrast to thermal processing of pepperoni for control of pathogens: effects on quality indicators 1260
changes in the quality of fresh-cut jicama in relation to storage temperatures and controlled atmospheres 1238
colostral whey
thermal stability of bovine milk immunoglobulin g (igg) and the effect of added thermal protectants on the stability 188
compaction
methodology to obtain true thermal conductivity of low porosity food powders 962
composition
structure and composition of mushrooms as affected by hydrogen peroxide wash 889
sensory and compositional relationships between commercial Cheddar-flavored enzyme-modified cheeses and natural Cheddar 1076
conjugated linoleic acid
selective increase in conjugated linoleic acid in milk fat by crystallization— . 792
conjugated linoleic acid content of Cheddar-type cheeses as affected by processing 874
connective tissue
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
CONTIN
relaxation time spectrum of hydrogels by CONTIN analysis 374
controlled atmosphere
quality changes in fresh-cut pear slices as affected by cultivar, ripeness stage, fruit size, and storage regime 541
cooked, cooking
thawing prior to cooking affects sensory, shear force, and cooking properties of beef patties 2
factors affecting premature browning during cooking of store-purchased ground beef 585
starch retrogradation and texture of cooked milled rice during storage ... 828
thermal inactivation kinetics of *Salmonella* and *Listeria* in ground chicken breast meat and liquid medium 706
cultivar, maturity, and heat treatment on lycopene content in tomatoes 791
oxidative stability and sensory attributes of prerigor cooked beef steak 1382
copper
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
corn
blanch time and cultivar effects on quality of frozen and stored corn and broccoli 534
effect of process conditions on the physical and sensory properties of extruded oat–corn puff 1253
corn flakes
degradation of vitamin A palmitate in corn flakes during storage 1216
corn starch, native
drying kinetics of hydrated and gelatinized corn starches in the presence of sucrose and sodium chloride 115
Crimson gene
cultivar, maturity, and heat treatment on lycopene content in tomatoes 791
croissant
pastry lift and croissant volume as affected by microbial transglutaminase 312
crosslinking
covalent crosslinking in heated protein systems 221
crust
oil absorption during frying of frozen parfried potatoes 476
cryoscopy
stability and activity of β-galactosidase in sonicated cultures of *Lactobacillus delbrueckii* ssp. Bulgaricus as affected by temperature and ionic environments 1364
crystallization
crystallization kinetics of amorphous lactose as a function of moisture content using isothermal differential scanning calorimetry 324
sorption isotherm and calorimetric behavior of amorphous/crystalline raffinose-water systems 646
selective increase in conjugated linoleic acid in milk fat by crystallization— . 792
curdlan
decreasing oil uptake of doughnuts during deep-fat frying using curdlan ... 883
cuttlefish
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
cysteine
development of a meat-like process flavoring from soybean-based enzyme-hydrolyzed vegetable protein (E-HVP) 1220
cytochrome B .....
rapid PCR-RFLP method for the identification of marine fish fillets (seabass, seabream, umbrine, and dentex) . 1315
D-galactosamine
liver injury-preventive effect of tea theanine in rats 30
D-value
thermal stability of bovine milk immunoglobulin g (igg) and the effect of added thermal protectants on the stability 188
pH affects the thermal inactivation parameters of r-phycoerythrin from *Porphyra yezoensis* 1046
dairy
aluminum content in foods and beverages consumed in the Spanish diet 206
selective increase in conjugated linoleic acid in milk fat by crystallization— . 792
stability and activity of β-galactosidase in sonicated cultures of *Lactobacillus delbrueckii* ssp. Bulgaricus as affected by temperature and ionic environments 1364
deacidification
phytosterol enrichment of rice bran oil by a supercritical carbon dioxide fractionation technique 1395
decimal reduction time
reduction of microflora of whole pickling

cucumbers by blanching 1354
decontamination
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
deodorization
deodorization of fish sauce by continuous-flow extraction with microbubbles of supercritical carbon dioxide 1349
deep-fat frying
decreasing oil uptake of doughnuts during deep-fat frying using curdlan ... 883
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
rheological characterization of rice flour-based batters 1194
degradation
degradation of vitamin A palmitate in corn flakes during storage 1216
degradation products
the effect of caramel coloring on the multiple degradation pathways of aspartame 1100
dehydration
heat and moisture transfer and hygrophysical changes in elastoplastic hollow cylinder-food during drying 315
dehydroascorbic acid
the effects of antioxidants on browning and on degradation products caused by dehydroascorbic acid 20
denaturation
pressure-induced denaturation of muscle proteins and its prevention by sugars and polyols 818
descriptive sensory analysis
sensory and compositional relationships between commercial Cheddar-flavored enzyme-modified cheeses and natural Cheddar 1076
tomato flavor and aroma quality as affected by storage temperature 1228
desorption isotherms
moisture diffusion and desorption isotherms for banana 651
dicationic salts
formulation protocol and dicationic salts affect protein functionality of model system beef batters 1151
dienal
precursors for formation of 2-pentyl pyridine in processing of soybean protein isolates 1155
differential scanning calorimetry
crystallization kinetics of amorphous lactose as a function of moisture content using isothermal differential scanning calorimetry 324
oil absorption during frying of frozen parfried potatoes 476
protein denaturation and structural damage during high-pressure-shift freezing of porcine and bovine muscle 1002
differentiation
rapid PCR-RFLP method for the identification of marine fish fillets (seabass, seabream, umbrine, and dentex) . 1315
diffusion
moisture diffusion and desorption isotherms for banana 651
diffusion of acetic and propionic acids from chitosan-based antimicrobial packaging films 768
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple 838
MRI observation and mathematical model simulation of water migration in wheat flour dough during boiling . 1343
dimethyl trisulfide
headspace evaluation of methanethiol and dimethyl trisulfide in aqueous solutions of soy-protein isolates 819
disinfection
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
chlorine generation and disinfection by electroflotation 834
dispersibility
physicochemical properties of frozen red hake (*Urophycis chuss*) mince as affected by cryoprotective ingredients .. 1117
dissolved oxygen
Degradation Kinetics of (-)-Epigallocatechin Gallate as a Function of pH and Dissolved Oxygen in a Liquid Model System 753
doughnuts
decreasing oil uptake of doughnuts during deep-fat frying using curdlan ... 883
drip loss
variations in rate of water loss as related to different types of post-rigor porcine musculature during storage 865
droplet size
ultrasonic spectroscopy study of salad dressings 507
dry fermented sausages
improvement of the sensory properties of dry fermented sausages by the superficial inoculation and/or the addition of intracellular extracts of *Mucor racemosus* 731
dry sausage
irradiation in contrast to thermal processing of pepperoni for control of pathogens: effects on quality indicators 1260
drying
moisture diffusion and desorption isotherms for banana 651
headspace volatiles and physical characteristics of vacuum-microwave, air, and freeze-dried oregano (*Lippia berlandieri schauer*) 926
solar drying of bananas: mathematical model, laboratory simulation, and field data compared 990
drying, drum
improved peanut flour for a reduced-fat peanut butter product 854
drying, optimal
mathematical evaluation of effective moisture diffusivity in fresh Japanese noodles (udon) by regular regime theory 440
drying, spray-
production and properties of spray-dried Amaranthus betacyanin pigments 1248
duck, mule
postmortem changes in mule duck muscle marinated in red wine 906
E. coli
survival and growth of *Vibrio cholerae O1, Salmonella typhi, and Escherichia coli* O157:H7 in alfalfa sprout 162
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
edible coatings
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
moisture loss and lipid oxidation for precooked beef patties stored in edible coatings and films 300
the gloss of edible coatings as affected by surfactants, lipids, relative humidity, and time 658
lipid addition to improve barrier properties of edible starch-based films and coatings 941
color stability of edible coatings during prolonged storage 1166
edible film
apple wraps: a novel method to improve the quality and extend the shelf life of fresh-cut apples 480
physical and molecular properties of egg-white lipid films 860
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
quality evaluation of edible film-coated chicken strips and frying oils 1087
effective moisture diffusivity
drying kinetics of hydrated and gelatinized corn starches in the presence of sucrose and sodium chloride 115
egg white
physical and molecular properties of egg-white lipid films 860
isostrength comparison of large-strain (fracture) rheological properties of egg white and whey protein gels 893
egg yolk
thermostability of hen egg yolk granules: contribution of native structure of granules 581
effects of antioxidants and packaging on lipid and cholesterol oxidation and color changes of irradiated egg yolk powder 625
functional properties of milk-egg mixtures 787
elastoplastic food
heat and moisture transfer and hygrophysical changes in elastoplastic hollow cylinder-food during drying 315
electrical conductivity
electrical conductance study of fluid motion and heat transport during starch gelatinization 144
electroacidification
comparison of electrochemical and chemical acidification of skim milk 1303
electroflotation
chlorine generation and disinfection by electroflotation 834
electro-viscous effects
effect of cloud particle characteristics on the viscosity of cloudy apple juice .. 641
electron microscopy
pore structure of coffee beans affected by roasting conditions 452
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491
electronic nose
tomato flavor and aroma quality as affected by storage temperature 1228
elongation
tensile properties of soy protein isolate films produced by a thermal compaction technique 668
emulsification
chemical and functional properties of oxidatively modified beef heart surimi stored at 2 °C 428
functionality changes in oxidatively/antioxidatively washed beef-heart surimi during frozen storage 796
emulsified fat
physical characteristics and microstructure of reduced-fat frankfurters as affected by salt and emulsified fats sta-

bilized with nonmeat proteins 123
emulsion stability
efficacy of the antimicrobial peptide nisin in emulsifying oil in water 502
thermostability of hen egg yolk granules: contribution of native structure of granules 581
emulsions
ultrasonic spectroscopy study of salad dressings 507
the gloss of edible coatings as affected by surfactants, lipids, relative humidity, and time 658
the emulsifying properties of commercial milk protein products in simple oil-in-water emulsions and in a model food system 934
lipid oxidation in oil-in-water emulsions: impact of molecular environment on chemical reactions in heterogeneous food systems 1270
endpoint temperature
factors affecting premature browning during cooking of store-purchased ground beef 585
energy
supplementation of energy-restricted diets with coconut oil improves nitrogen balance without elevation of blood cholesterol levels 1066
Enterobacteriaceae
changes in the amino acid composition of green olive brine due to fermentation by pure culture of bacteria 1022
enterotoxin A
growth and production of enterotoxin A by *Staphylococcus aureus* on "home-style" french fries 913
enthalpy/entropy
water sorption enthalpy-entropy compensation based on isotherms of plum skin and pulp 680
enzymatic browning
kinetic study of antibrowning agents and pressure inactivation of avocado polyphenoloxidase 823
enzymatic debittering
debittering of a tryptic digest of bovine β-casein using porcine kidney general aminopeptidase and x-prolydipeptidyl aminopeptidase from *Lactococcus lactis* ssp. cremoris AM2 1145
enzymatic degradation
proteolytic degradation of tropical tilapia surimi 129
enzymatic reaction
inactivation of nisin by glutathione in fresh meat 759
enzymatic synthesis
enzymatic hydrolysis and synthesis of soy protein to improve its amino acid composition and functional properties 246
enzyme activity
impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
enzyme kinetics
purification and kinetic characterization of peroxidase from tomato cultivated under different salinity conditions .. 15
enzyme-modified cheese
sensory and compositional relationships between commercial Cheddar-flavored enzyme-modified cheeses and natural Cheddar 1076
enzyme hydrolyzed vegetable protein
development of a meat-like process flavoring from soybean-based enzyme-hydrolyzed vegetable protein (E-HVP) 1220
enzymes
blanch time and cultivar effects on quality of frozen and stored corn and broccoli 534
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases 826
epigallocatechin gallate
Degradation Kinetics of (-)-Epigallocatechin Gallate as a Function of pH and Dissolved Oxygen in a Liquid Model System 753
Escherichia coli
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. *529*
quality improvement of mackerel surimi with NADPH-sulfite reductase from *Escherichia coli* 1400
ethanol
salt-free miso fermentation using ethanol, sugars, and polyols 918
ethoxyquin
residues of ethoxyquin and ethoxyquin dimer in ocean-farmed salmonids determined by high-pressure liquid chromatography 1312
ethylene
exogenous polyamines and gibberellic acid effects on peach (*Prunus persica* l.) storability improvement 288
Eubacterium
effects of *Eubacterium coprostanoligenes* and *Lactobacillus* on pH, lipid content, and cholesterol of fermented pork and mutton sausage-type mixes 903
excreta
identification of rodent filth exhibits 1391
extraction
extracting conditions for megrim (*Lepidorhombus boscii*) skin collagen affect functional properties of the resulting gelatin 434
optimizing apple juice extraction in multiple presses 461
extraction, continuous
deodorization of fish sauce by continuous-flow extraction with microbubbles of supercritical carbon dioxide 1349
extrusion
covalent crosslinking in heated protein systems 221
texture and chemical characteristics of soy protein meat analog extruded at high moisture 264
extrusion
flow characterization of peach products during extrusion 471
effect of process conditions on the physical and sensory properties of extruded oat–corn puff 1253
exudative meats
early postmortem detection of exudative pork meat based on nucleotide content 413
fat
flavor manipulation can enhance the impression of fat in some foods 909
effect of aspartame and fat on sweetness perception in yogurt 1056
fat content
plasma protein and soy fiber content effect on bologna sausage properties as influenced by fat level 281
fat-free
effects of ingredients on the functionality of fat-free process cheese spreads 822
fat perception
flavor manipulation can enhance the impression of fat in some foods 909
fat replacers
viscosity and textural attributes of reduced-fat peanut pastes 849
fatty acid composition
volatiles and oxidative changes in irradiated pork sausage with different fatty acid composition and tocopherol content 270
comparison of cheeses made from milk having normal and high oleic fatty acid compositions 920
fermentation
changes in the amino acid composition of green olive brine due to fermentation by pure culture of bacteria 1022
filamentous fungi
a fluorescent lectin test for mold in raw tomato juice 346
film
tensile properties of soy protein isolate films produced by a thermal compaction technique 668
quality of shredded carrots as affected by packaging film and storage temperature 726
water vapor transmission rates and sorption behavior of chitosan films 1175
firmness
nondestructive methods to evaluate maturity level of oranges 365
texture changes associated with insolubilization of sarcoplasmic proteins during salt-vinegar curing of fish 804
fish
physicochemical and sensory characteristics of fish gelatin 194
organochlorines, organophosphates, and pyrethroids in channel catfish, rainbow trout, and red swamp crayfish from aquaculture facilities 231
postmortem changes in black skipjack muscle during storage in ice 774
quality index method developed for raw gilthead seabream (*Sparus aurata*) 1202
fish, cat-
changes in selected chemical quality characteristics of channel catfish frame mince during chill and frozen storage 24
microbiological and color quality changes of channel catfish frame mince during chilled and frozen storage 151
stability of washed frozen mince from channel catfish frames 1083
influence of ozone, hydrogen peroxide, or salt on microbial profile, tbars and color of channel catfish fillets 1210
fish freshness
a new approach for the determination of fish freshness by electrochemical impedance spectroscopy 780
fish, marine
rapid PCR-RFLP method for the identification of marine fish fillets (seabass, seabream, umbrine, and dentex) . 1315
fish, mackerel
quality improvement of mackerel surimi with NADPH-sulfite reductase from *Escherichia coli* *1400*
fish mince
physicochemical properties of frozen red hake (*Urophycis chuss*) mince as affected by cryoprotective ingredients .. 1117
fish muscle
residues of ethoxyquin and ethoxyquin dimer in ocean-farmed salmonids determined by high-pressure liquid chromatography 1312
fish myosin
fish myosin aggregation as affected by freezing and initial physical state—556
fish oil
antioxidant activity of whey in a salmon

oil emulsion 1325
fish, paddle-
gelation characteristics of paddlefish (*Polyodon spathula*) surimi under different heating conditions 394
fish sauce
deodorization of fish sauce by continuous-flow extraction with microbubbles of supercritical carbon dioxide 1349
fish skin
extracting conditions for megrim (*Lepidorhombus boscii*) skin collagen affect functional properties of the resulting gelatin 434
flavor
headspace volatiles of sockeye and pink salmon as affected by retort process 34
synthesis of low molecular weight flavor esters using plant seedling lipases in organic media 295
characterization and functional properties of rice bran proteins modified by commercial exoproteases and endoproteases 305
sensory, shear, and cooking properties of lower-fat beef patties made with inner pea fiber 805
flavor and oxidative stability of peanut–sesame–soy blends 901
flavor manipulation can enhance the impression of fat in some foods 909
flour improver
pastry lift and croissant volume as affected by microbial transglutaminase 312
foams
measurement of the yield stress of protein foams by vane rheometry 110
food colorants
production and properties of spray-dried Amaranthus betacyanin pigments 1248
food gel
relaxation time spectrum of hydrogels by CONTIN analysis 374
food powder
methodology to obtain true thermal conductivity of low porosity food powders 962
food protein
extrusion cooking process for amaranth (*Amaranthus caudatus l.*) 1009
food protein derivatization
reactions of chlorogenic acid with lysozyme: physicochemical characterization and proteolytic digestion of the derivatives 1091
food safety
survival and growth of *Vibrio cholerae O1, Salmonella typhi, and Escherichia coli* O157:H7 in alfalfa sprout 162
intrepretation of and extraction of useful information from irregular fluctuating industrial microbial counts 740
chlorine generation and disinfection by electroflotation 834
a quantitative process model for *Salmonella enteritidis* in shell eggs 864
formulation
formulation protocol and dicationic salts affect protein functionality of model system beef batters 1151
fortification
stability of retinyl palmitate during cooking and storage in rice fortified with Ultra Rice™ fortification technology ... 915
soy protein fortification affects sensory, chemical, and microbiological properties of dairy yogurts 1244
fractal
viscoelastic changes of rice starch suspensions during gelatinization 215
fractional conversion
the use of fractional conversion technique to investigate the effects of testing parameters on texture degradation kinetics 968
fractionation
bioactive properties of wild blueberry fruits 352
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases 826
frankfurters
physical characteristics and microstructure of reduced-fat frankfurters as affected by salt and emulsified fats stabilized with nonmeat proteins 123
free fatty acids
hydrolytic and oxidative changes in the lipids of chicken breast and thigh muscles during refrigerated storage 9
quality evaluation of edible film-coated chicken strips and frying oils 1087
free radicals
the binding of H_2O_2-generated Fe(III) to *Bifidobacterium thermophilum* depends on the method of its production 1028
freeze-dried food
mathematical model for prediction of glass transition temperature of fruit powders 842
freezing
preservation of microstructure in peach and mango during high-pressure-shift freezing 466
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722
French fries
growth and production of enterotoxin A by *Staphylococcus aureus* on "home-style" French fries 913
fresh-cut
rhubarb juice as a natural antibrowning agent 1288
antimicrobial efficacy of a peroxyacetic/octanoic acid mixture in fresh-cut-vegetable process waters 1376
freshness
postmortem biochemical and functional characteristic of monterey sardine muscle stored at 0 °C 40
fried food
quality evaluation of edible film-coated chicken strips and frying oils 1087
frozen stability
fish myosin aggregation as affected by freezing and initial physical state—556
frozen storage
blanch time and cultivar effects on quality of frozen and stored corn and broccoli 534
stability of washed frozen mince from channel catfish frames 1083
physicochemical properties of frozen red hake (*Urophycis chuss*) mince as affected by cryoprotective ingredients .. 1117
fructooligosaccharides
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin 884
fruit puree
apple wraps: a novel method to improve the quality and extend the shelf life of fresh-cut apples 480
frying
oil absorption during frying of frozen parfried potatoes 476
calcium absorption in rats consuming olive oil or sunflower oil unused or used in frying 892
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
fumonisins
fumonisin B_1 production and growth of *Fusarium moniliforme* and *Fusarium proliferatum* on maize, wheat, and barley grain 921
functional food
selective increase in conjugated linoleic acid in milk fat by crystallization— . 792
functional properties
biological characteristics affect the quality of farmed atlantic salmon and smoked muscle 53
characterization and functional properties of rice bran proteins modified by commercial exoproteases and endoproteases 305
extracting conditions for megrim (*Lepidorhombus boscii*) skin collagen affect functional properties of the resulting gelatin 434
gelling properties of whey proteins after enzymic fat hydrolysis 561
functional properties of milk-egg mixtures 787
functionality
enzymatic hydrolysis and synthesis of soy protein to improve its amino acid composition and pH induced aggregation and weak gel formation of whey protein polymers 139
functional properties 246
effects of ingredients on the functionality of fat-free process cheese spreads 822
Fusarium
fumonisin B_1 production and growth of *Fusarium moniliforme* and *Fusarium proliferatum* on maize, wheat, and barley grain 921
γ-glutamyl-β-alanyl-histidine
incorporation of histidine and β-alanine into the macromolecular fraction of beef soup stock during heating 596
galactooligosaccharides
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin 884
galactosidase activity
production of kefir from soymilk with or without added glucose, lactose, or sucrose 716
gamma irradiation
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
gas chromatography-olfactometry
volatiles from unpasteurized and excessively heated orange juice analyzed with solid phase microextraction and gc-olfactometry 800
gas permeabilities
lipid addition to improve barrier properties of edible starch-based films and coatings 941
gastrointestinal conditions
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions 1060
gel chromatography
purification of glycomacropeptide from caseinate hydrolysate by gel chromatography and treatment with acidic solution 588

gel-sol transition
effects of salts on the thermal reversibility of starch and hsian-tsao (*Mesona procumbens hemsl*) leaf gum mixed system 954
gelatin
physicochemical and sensory characteristics of fish gelatin 194
extracting conditions for megrim (*Lepidorhombus boscii*) skin collagen affect functional properties of the resulting gelatin 434
gelatinization
drying kinetics of hydrated and gelatinized corn starches in the presence of sucrose and sodium chloride 115
viscoelastic changes of rice starch suspensions during gelatinization 215
differences in hollow volumes in cooked rice grains with various amylose contents as determined by NMR micro imaging 408
gelation
pH induced aggregation and weak gel formation of whey protein polymers 139
gelation and water binding properties of transglutaminase-treated skim milk powder 200
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
gelation characteristics of paddlefish (*Polyodon spathula*) surimi under different heating conditions 394
chemical and functional properties of oxidatively modified beef heart surimi stored at 2 °C 428
gelling properties of whey proteins after enzymic fat hydrolysis 561
porcine plasma proteins as a surimi protease inhibitor: effects on actomyosin gelation 607
functionality changes in oxidatively/antioxidatively washed beef-heart surimi during frozen storage 796
influence of NaCl and $CaCl_2$ on cold-set gelation of heat-denatured whey protein 801
gels
postmortem biochemical and functional characteristic of monterey sardine muscle stored at 0 °C 40
microbial transglutaminase affects gel properties of golden threadfin-bream and pollack surimi 694
isostrength comparison of large-strain (fracture) rheological properties of egg white and whey protein gels 893
effect of hydration time and salt addition on gelation properties of major protein additives 1338
gels, weak-
pH induced aggregation and weak gel formation of whey protein polymers 139
genistein
evaluation of genistin and genistein contents in soybean varieties and soy protein concentrate prepared with 3 basic methods 399
enrichment of genistein in soy protein concentrate with β-glucosidase 403
enrichment of genistein in soy protein concentrate with hydrocolloids and β-glucosidase 591
gibberellic acid
exogenous polyamines and gibberellic acid effects on peach (*Prunus persica* l.) storability improvement 288
gilthead seabream
quality index method developed for raw gilthead seabream (*Sparus aurata*) 1202
glass transition
plasticizing–antiplasticizing effects of water on physical properties of tapioca starch films in the glassy state 445
thiamin stability in solids as affected by the glass transition 498
sorption isotherm and calorimetric behavior of amorphous/crystalline raffinose-water systems 646
mathematical model for prediction of glass transition temperature of fruit powders 842
the contribution of water to the specific heat change at the glass-to-rubber transition of the ternary system BSA-water-NaCl 1187
gloss
the gloss of edible coatings as affected by surfactants, lipids, relative humidity, and time 658
glucose oxidase
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes 808
glycolipids
analyses of glycolipids in clove, red pepper, and nutmeg by high-performance liquid chromatography 931
glycolytic rate
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786
glycomacropeptide
purification of glycomacropeptide from caseinate hydrolysate by gel chromatography and treatment with acidic solution 588
GMO
detection of residues of genetically modified soybeans in breaded fried turkey cutlets 604
gnawing
identification of rodent filth exhibits 1391
Gompertz model
inoculum size of *Clostridium botulinum* 56A spores influences time-to-detection and percent growth-positive samples 1369
granule structure
thermostability of hen egg yolk granules: contribution of native structure of granules 581
granule swelling
electrical conductance study of fluid motion and heat transport during starch gelatinization 144
grapes
changes in biogenic amine content of tokaj grapes, wines, and aszu-wines 1142
green beans
β-carotene and ascorbic acid retention in fresh and processed vegetables 929
green tea
liver injury-preventive effect of tea theanine in rats 30
growth
production of kefir from soymilk with or without added glucose, lactose, or sucrose 716
fumonisin B_1 production and growth of *Fusarium moniliforme* and *Fusarium proliferatum* on maize, wheat, and barley grain 921
gum
influences of gums, soy protein isolate, and heating temperatures on reduced-fat meat batters in a model system .. 48
HACCP
microbial flora associated with Louisiana processed frozen and fresh nutria (*Myocastor coypus*) carcasses 1041
hairtail
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
halal
physicochemical and sensory characteristics of fish gelatin 194
hamster
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897
haze
high hydrostatic pressure treatments for beer stabilization 974
Hazelnut
antioxidant activity of nontocopherol hazelnut (*Corylus* spp.) phenolics 276
headspace
volatiles from unpasteurized and excessively heated orange juice analyzed with solid phase microextraction and gc-olfactometry 800
headspace volatiles
headspace evaluation of methanethiol and dimethyl trisulfide in aqueous solutions of soy-protein isolates 819
heat and moisture transfer
heat and moisture transfer and hygrophysical changes in elastoplastic hollow cylinder-food during drying 315
heat degradation
covalent crosslinking in heated protein systems 221
heat denaturation
color and heat denaturation of myoglobin forms in ground beef 847
heat-denatured
influence of NaCl and $CaCl_2$ on cold-set gelation of heat-denatured whey protein 801
heat gelation
functional properties of milk-egg mixtures 787
heat of sorption
water sorption enthalpy-entropy compensation based on isotherms of plum skin and pulp 680
heat penetration
statistical variability of heat penetration parameters in relation to process design 685
heat treatment
thermostability of hen egg yolk granules: contribution of native structure of granules 581
thermal aggregation of whey proteins in model solutions as affected by casein/whey protein ratios 776
heat-induced gels
effect of high pressure processing at different temperatures on protein functionality of porcine blood plasma— 486
heating
influence of carotenoids and pulps on the color modification of blood orange juice 458
statistical variability of heat penetration parameters in relation to process design 685
HEp2 cells
short chain fatty acids alter HEp2 cell association and invasion by stationary growth phase *Salmonella typhimurium*

1206
herbs
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions 1060
high hydrostatic presure
effect of high pressure processing at different temperatures on protein functionality of porcine blood plasma— 486
high hydrostatic pressure treatments for beer stabilization 974
impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
high-oleic peanut
flavor and oxidative stability of peanut–sesame–soy blends 901
high pressure
comparison of air-blast and pressure shift freezing on Norway lobster quality 329
preservation of microstructure in peach and mango during high-pressure-shift freezing 466
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491
high hydrostatic pressure for accelerating ripening of goat's milk cheese: proteolysis and texture 636
pressure-induced denaturation of muscle proteins and its prevention by sugars and polyols 818
kinetic study of antibrowning agents and pressure inactivation of avocado polyphenoloxidase 823
ripening profiles of goat cheese produced from milk treated with high pressure– 833
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple 838
high-pressure-shift freezing
protein denaturation and structural damage during high-pressure-shift freezing of porcine and bovine muscle 1002
hollow cylinder-food
heat and moisture transfer and hygrophysical changes in elastoplastic hollow cylinder-food during drying 315
hollow volume
differences in hollow volumes in cooked rice grains with various amylose contents as determined by NMR micro imaging 408
homogalacturonan
molecular composition of onion pectic acid 1160
HPLC
antioxidant activity of nontocopherol hazelnut (*Corylus* spp.) phenolics 276
biogenic amines in Turkish sausages (sucuks) 764
analyses of glycolipids in clove, red pepper, and nutmeg by high-performance liquid chromatography 931
thermal degradation of partially purified paralytic shellfish poison toxins at different times, temperatures, and pH 948
hsian-tsao gum
effects of salts on the thermal reversibility of starch and hsian-tsao (*Mesona procumbens hemsl*) leaf gum mixed system 954
husk scald
modified atmosphere packaging of pomegranate 1112
hydration
optimizing apple juice extraction in multiple presses 461
effect of hydration time and salt addition on gelation properties of major protein additives 1338
hydrocolloids
enrichment of genistein in soy protein concentrate with hydrocolloids and β-glucosidase 591
hydrogen peroxide
structure and composition of mushrooms as affected by hydrogen peroxide wash 889
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
production of hydrogen peroxide by *Lactobacillus delbrueckii* ssp. lactis as influenced by media used for propagation of cells 1033
influence of ozone, hydrogen peroxide, or salt on microbial profile, tbars and color of channel catfish fillets 1210
hydrolyzed whey protein
water vapor permeability and solubility of films from hydrolyzed whey protein 700
hydroponics
quality comparison of hydroponic tomatoes (*Lycopersicon esculentum*) ripened on and off vine 545
hydroxytyrosol
optimization of simulated ripe olive darkening in presence of manganese 254
hydroxymethylfurfural
HMF formation during heat-treatment of milk-type products as related to milkfat content 855
hygrophysical changes
heat and moisture transfer and hygrophysical changes in elastoplastic hollow cylinder-food during drying 315
hypertensivity, spontaneous
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins 564
hysteresis
effects of cation properties on sol-gel transition and gel properties of κ-carrageenan 1332
ice cream
Amaranthus betacyanin pigments applied in model food systems 869
ice crystals
comparison of air-blast and pressure shift freezing on Norway lobster quality 329
identification
identification of rodent filth exhibits 1391
immobilization
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases 826
immobilized mycelia
decolorization of brown pigments in foods by immobilized mycelia of *Coriolus versicolor* IFO 30340 and *Paecilomyces canadensis* NC-1 870
impedance
a new approach for the determination of fish freshness by electrochemical impedance spectroscopy 780
in vitro
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions 1060
in-vitro proteolytic degradation
reactions of chlorogenic acid with lysozyme: physicochemical characterization and proteolytic digestion of the derivatives 1091
inactivation
combined pressure–temperature inactivation of alkaline phosphatase in bovine milk: a kinetic study 155
inactivation kinetics of foodborne spoilage and pathogenic bacteria by ozone 521
inactivation of nisin by glutathione in fresh meat 759
kinetic study of antibrowning agents and pressure inactivation of avocado polyphenoloxidase 823
infant milks
stability of vitamins A, E, and B complex in infant milks claimed to have equal final composition in liquid and powdered form 1052
inoculum size
inoculum size of *Clostridium botulinum* 56A spores influences time-to-detection and percent growth-positive samples 1369
instrumental
instrumental and expert assessment of mahon cheese texture 1170
inulin
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin 884
invasion
short chain fatty acids alter HEP-2 cell association and invasion by stationary growth phase *Salmonella typhimurium* 1206
iron
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
in vitro digestion/caco-2 cell culture model to determine optimal ascorbic acid to Fe ratio in rice cereal 925
the binding of H_2O_2-generated Fe(III) to *Bifidobacterium thermophilum* depends on the method of its production 1028
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions 1060
irradiation
volatiles and oxidative changes in irradiated pork sausage with different fatty acid composition and tocopherol content 270
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
production of volatile compounds from irradiated oil emulsion containing amino acids or proteins 612
effects of antioxidants and packaging on lipid and cholesterol oxidation and color changes of irradiated egg yolk powder 625
irradiation in contrast to thermal processing of pepperoni for control of pathogens: effects on quality indicators 1260
isolate
comparison of electrochemical and chemical acidification of skim milk 1303
isotherms
sorption isotherm and calorimetric behavior of amorphous/crystalline raffinose-water systems 646
water sorption enthalpy-entropy compensation based on isotherms of plum

skin and pulp 680
water vapor transmission rates and sorption behavior of chitosan films 1175
Japanese noodle
mathematical evaluation of effective moisture diffusivity in fresh Japanese noodles (udon) by regular regime theory 440
jelly
Amaranthus betacyanin pigments applied in model food systems 869
K value
postmortem biochemical and functional characteristic of monterey sardine muscle stored at 0 °C 40
postmortem changes in black skipjack muscle during storage in ice 774
kangaroo meat
differentiation of beef and kangaroo meat by visible/near-infrared reflectance spectroscopy 814
kefir
production of kefir from soymilk with or without added glucose, lactose, or sucrose 716
kinetics
oil absorption during frying of frozen parfried potatoes 476
thiamin stability in solids as affected by the glass transition 498
inactivation kinetics of foodborne spoilage and pathogenic bacteria by ozone 521
degradation kinetics of (-)-epigallocatechin gallate as a function of ph and dissolved oxygen in a liquid model system 753
thermal degradation of partially purified paralytic shellfish poison toxins at different times, temperatures, and pH 948
degradation kinetics of chlorophyll in peas as a function of pH 1296
kininogen
purification and characterization of low molecular weight kininogen from pig plasma 81
inhibition of thermal degradation of mackerel surimi by pig plasma protein and l-kininogen 1124
koji proteases
salt-free miso fermentation using ethanol, sugars, and polyols 918
konnyaku
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491
kosher
physicochemical and sensory characteristics of fish gelatin 194
lactic acid bacteria
changes in the amino acid composition of green olive brine due to fermentation by pure culture of bacteria 1022
Lactobacillus
contribution of *Lactococcus lactis* ssp. lactis IFPL 359 and *Lactobacillus casei* ssp. casei IFPL 731 to the proteolysis of caprine curd slurries 711
destruction of *Yersinia enterocolitica* by *Lactobacillus sake* and *Pediococcus acidilactici* during low-temperature fermentation of Turkish dry sausage (sucuk) 876
hydrolysis of β-casein (193-209) fragment by whole cells and fractions of *Lactobacillus casei* and *Lactococcus lactis* 899
effects of *Eubacterium coprostanoligenes* and *Lactobacillus* on pH, lipid content, and cholesterol of fermented pork and mutton sausage-type mixes 903
production of hydrogen peroxide by *Lactobacillus delbrueckii* ssp. lactis as influenced by media used for propagation of cells 1033
stability and activity of β-galactosidase in sonicated cultures of *Lactobacillus delbrueckii* ssp. Bulgaricus as affected by temperature and ionic environments 1364
lactose
crystallization kinetics of amorphous lactose as a function of moisture content using isothermal differential scanning calorimetry 324
lactose hydrolysis
stability and activity of β-galactosidase in sonicated cultures of *Lactobacillus delbrueckii* ssp. Bulgaricus as affected by temperature and ionic environments 1364
lamb
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786
lard
effects of fractionation and the refining process of lard on cholesterol removal by β-cyclodextrin 622
Lauritzen-Hoffman
crystallization kinetics of amorphous lactose as a function of moisture content using isothermal differential scanning calorimetry 324
LBS
production of hydrogen peroxide by *Lactobacillus delbrueckii* ssp. lactis as influenced by media used for propagation of cells 1033
lectin
a fluorescent lectin test for mold in raw tomato juice 346
lentils
interaction of low molecular weight phenolics with proteins (BSA) 617
lethality
thermal inactivation kinetics of *Salmonella* and *Listeria* in ground chicken breast meat and liquid medium 706
lettuce, romaine
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
lipase
gelling properties of whey proteins after enzymic fat hydrolysis 561
lipid addition
lipid addition to improve barrier properties of edible starch-based films and coatings 941
lipid oxidation
postmortem biochemical and functional characteristic of monterey sardine muscle stored at 0 °C 40
volatiles and oxidative changes in irradiated pork sausage with different fatty acid composition and tocopherol content 270
moisture loss and lipid oxidation for precooked beef patties stored in edible coatings and films 300
production of volatile compounds from irradiated oil emulsion containing amino acids or proteins 612
effects of antioxidants and packaging on lipid and cholesterol oxidation and color changes of irradiated egg yolk powder 625
postmortem changes in black skipjack muscle during storage in ice 774
lipid oxidation in oil-in-water emulsions: Impact of molecular environment on chemical reactions in heterogeneous food systems 1270
antioxidant activity of whey in a salmon oil emulsion 1325
lipids
stability of washed frozen mince from channel catfish frames 1083
lipolysis
hydrolytic and oxidative changes in the lipids of chicken breast and thigh muscles during refrigerated storage 9
lipoxygenase
impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
Listeria monocytogenes
predicting lethal effect of ultrasonic waves under pressure treatments on *Listeria monocytogenes* ATCC 15313 by power measurements 663
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
liver injury
liver injury-preventive effect of tea theanine in rats 30
lobster, Norway
comparison of air-blast and pressure shift freezing on Norway lobster quality 329
logistic regression
modeling the growth/no-growth interface of *Zygosaccharomyces bailii* in mango puree 516
low-fat
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
evaluation of konjac blends and soy protein isolate as fat replacements in low-fat bologna 756
sensory, shear, and cooking properties of lower-fat beef patties made with inner pea fiber 805
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
low molecular weight phenolics
interaction of low molecular weight phenolics with proteins (BSA) 617
low-salt
physical characteristics and microstructure of reduced-fat frankfurters as affected by salt and emulsified fats stabilized with nonmeat proteins 123
low-voltage electrical stimulation
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786
lycopene
lycopene stability in tomato powders . 67
degradation of lycopene, α-carotene, and β-carotene during lipid peroxidation 71
cultivar, maturity, and heat treatment on lycopene content in tomatoes 791
Lycopersicon esculentum
quality comparison of hydroponic tomatoes (*Lycopersicon esculentum*) ripened on and off vine 545
tomato flavor and aroma quality as affected by storage temperature 1228
lysozyme
reactions of chlorogenic acid with

lysozyme: physicochemical characterization and proteolytic digestion of the derivatives 1091
mackerel
texture changes associated with insolubilization of sarcoplasmic proteins during salt-vinegar curing of fish 804
macromolecular fraction
incorporation of histidine and β-alanine into the macromolecular fraction of beef soup stock during heating 596
Mahon
instrumental and expert assessment of mahon cheese texture 1170
Maillard reaction
HMF formation during heat-treatment of milk-type products as related to milkfat content 855
decolorization of brown pigments in foods by immobilized mycelia of *Coriolus versicolor* IFO 30340 and *Paecilomyces canadensis* NC-1 870
MALDITOF MS
inactivation of nisin by glutathione in fresh meat 759
manganese
optimization of simulated ripe olive darkening in presence of manganese 254
mango
modeling the growth/no-growth interface of *Zygosaccharomyces bailii* in mango puree 516
manosonication
predicting lethal effect of ultrasonic waves under pressure treatments on *Listeria monocytogenes* ATCC 15313 by power measurements 663
mantle
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
marination
^{1}h NMR studies of water in chicken breast marinated with different phosphates 575
marination, red wine
postmortem changes in mule duck muscle marinated in red wine 906
mass transfer
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple 838
evaluation of mass transfer mechanisms during osmotic treatment of plant materials 1016
mathematical models
mathematical model for prediction of glass transition temperature of fruit powders 842
maturity stage
cultivar, maturity, and heat treatment on lycopene content in tomatoes 791
meat
inactivation of nisin by glutathione in fresh meat 759
meat batters
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
meat emulsion
plasma protein and soy fiber content effect on bologna sausage properties as influenced by fat level 281
mechanical damage
exogenous polyamines and gibberellic acid effects on peach (*Prunus persica* l.) storability improvement 288
mercury porosimetry
pore structure of coffee beans affected by roasting conditions 452
methanethiol
headspace evaluation of methanethiol and dimethyl trisulfide in aqueous solutions of soy-protein isolates 819
methionine
enzymatic hydrolysis and synthesis of soy protein to improve its amino acid composition and functional properties 246
micellar calcium phosphate
effect of temperature of milk acidification on rennet gel properties 630
microbial counts
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
intrepretation of and extraction of useful information from irregular fluctuating industrial microbial counts 740
microbial decolorization
decolorization of brown pigments in foods by immobilized mycelia of *Coriolus versicolor* IFO 30340 and *Paecilomyces canadensis* NC-1 870
microbial pathogen
a quantitative process model for *Salmonella enteritidis* in shell eggs 864
microbial profile
influence of ozone, hydrogen peroxide, or salt on microbial profile, tbars and color of channel catfish fillets 1210
microfiltration
effect of cottage cheese whey pretreatment and 2-phase crossflow microfiltration/ultrafiltration on permeate flux and composition 334
microorganisms
microbiological and color quality changes of channel catfish frame mince during chilled and frozen storage 151
effects of pulsed electric fields on the activities of microorganisms and pectin methyl esterase in orange juice 1359
microscopy
thermal aggregation of whey proteins in model solutions as affected by casein/whey protein ratios 776
microstructure
physical characteristics and microstructure of reduced-fat frankfurters as affected by salt and emulsified fats stabilized with nonmeat proteins 123
viscoelastic, thermal, and microstructural characterization of soy protein isolate films 672
lipid addition to improve barrier properties of edible starch-based films and coatings 941
lipid oxidation in oil-in-water emulsions: impact of molecular environment on chemical reactions in heterogeneous food systems 1270
milk
combined pressure–temperature inactivation of alkaline phosphatase in bovine milk: a kinetic study 155
HMF formation during heat-treatment of milk-type products as related to milkfat content 855
predicting the cutting time of coagulating milk for cheese production using a heated thermistor 879
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin 884
milk protein
the emulsifying properties of commercial milk protein products in simple oil-in-water emulsions and in a model food system 934
milkfat
selective increase in conjugated linoleic acid in milk fat by crystallization— . 792
HMF formation during heat-treatment of milk-type products as related to milkfat content 855
mince
changes in selected chemical quality characteristics of channel catfish frame mince during chill and frozen storage 24
microbiological and color quality changes of channel catfish frame mince during chilled and frozen storage 151
minimal processing
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
quality changes in fresh-cut pear slices as affected by cultivar, ripeness stage, fruit size, and storage regime 541
influence of blanching-osmotic dehydration treatments on volatile fraction of strawberries 1107
miso
salt-free miso fermentation using ethanol, sugars, and polyols 918
modeling
thermal inactivation kinetics of *Salmonella* and *Listeria* in ground chicken breast meat and liquid medium 706
Degradation Kinetics of (-)-Epigallocatechin Gallate as a Function of pH and Dissolved Oxygen in a Liquid Model System 753
solar drying of bananas: mathematical model, laboratory simulation, and field data compared 990
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
modeling, probabilistic
modeling the growth/no-growth interface of *Zygosaccharomyces bailii* in mango puree 516
moisture diffusivity
mathematical evaluation of effective moisture diffusivity in fresh Japanese noodles (udon) by regular regime theory 440
moisture loss
moisture loss and lipid oxidation for precooked beef patties stored in edible coatings and films 300
mold detection
a fluorescent lectin test for mold in raw tomato juice 346
molds
improvement of the sensory properties of dry fermented sausages by the superficial inoculation and/or the addition of intracellular extracts of *Mucor racemosus* 731
molecular composition
molecular composition of onion pectic acid 1160
molecular mobility
study of caking in powdered foods using nuclear magnetic resonance spectroscopy 134
Monascus purpureus
fermentation of *Monascus purpureus* on bacterial cellulose-nata and the color stability of *Monascus*-nata complex 342
mouthfeel
viscosity and textural attributes of reduced-fat peanut pastes 849
MRI
MRI observation and mathematical model simulation of water migration in

wheat flour dough during boiling . 1343
MRS
production of hydrogen peroxide by *Lactobacillus delbrueckii* ssp. lactis as influenced by media used for propagation of cells 1033
MTGase
technical approach to simplify the purification method and characterization of microbial transglutaminase produced from *Streptovercillium ladakanum* 76
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
microbial transglutaminase affects gel properties of golden threadfin-bream and pollack surimi 694
mucilage
polysaccharide constituents of coffee-bean mucilage 1308
Mucor racemosus
improvement of the sensory properties of dry fermented sausages by the superficial inoculation and/or the addition of intracellular extracts of *Mucor racemosus* 731
multiple pathways
the effect of caramel coloring on the multiple degradation pathways of aspartame 1100
multivariate discriminant analysis
tomato flavor and aroma quality as affected by storage temperature 1228
muscle
hydrolytic and oxidative changes in the lipids of chicken breast and thigh muscles during refrigerated storage 9
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
postmortem changes in mule duck muscle marinated in red wine 906
partial purification and characterization of chinook salmon (*Oncorhynchus tshawytscha*) calpains and an evaluation of their role in postmortem proteolysis 1318
muscle proteins
pressure-induced denaturation of muscle proteins and its prevention by sugars and polyols 818
muscle ultrastructure
protein denaturation and structural damage during high-pressure-shift freezing of porcine and bovine muscle 1002
mushroom
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722
structure and composition of mushrooms as affected by hydrogen peroxide wash 889
textural changes in mushrooms (*Agaricus bisporus*) associated with tissue ultrastructure and composition 1404
mutton
effects of *Eubacterium coprostanoligenes* and *Lactobacillus* on pH, lipid content, and cholesterol of fermented pork and mutton sausage-type mixes 903
myofibril
protein extraction from chicken myofibrils irrigated with various polyphosphate and NaCl solutions 96
chemical, physical, and gel-forming properties of oxidized myofibrils and whey- and soy-protein isolates 811
myoglobin
factors affecting premature browning during cooking of store-purchased ground beef 585
color and heat denaturation of myoglobin forms in ground beef 847
myosin
formulation protocol and dicationic salts affect protein functionality of model system beef batters 1151
NaCl
the contribution of water to the specific heat change at the glass-to-rubber transition of the ternary system BSA-water-NaCl 1187
NADPH-sulfite reductase
quality improvement of mackerel surimi with NADPH-sulfite reductase from *Escherichia coli* 1400
nata
fermentation of *Monascus purpureus* on bacterial cellulose-nata and the color stability of *Monascus*-nata complex 342
nesting material
identification of rodent filth exhibits 1391
neural network
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
nisin
efficacy of the antimicrobial peptide nisin in emulsifying oil in water 502
inactivation of nisin by glutathione in fresh meat 759
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
nitrate
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
nitrogen balance
supplementation of energy-restricted diets with coconut oil improves nitrogen balance without elevation of blood cholesterol levels 1066
NMR
study of caking in powdered foods using nuclear magnetic resonance spectroscopy 134
differences in hollow volumes in cooked rice grains with various amylose contents as determined by NMR micro imaging 408
^{1}H NMR studies of water in chicken breast marinated with different phosphates 575
nonthermal processing/technology
effects of pulsed electric fields on microorganisms in orange juice using electric field strengths of 30 and 50 kv/cm .. 984
impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
effects of pulsed electric fields on the activities of microorganisms and pectin methyl esterase in orange juice 1359
nose clips
flavor manipulation can enhance the impression of fat in some foods 909
nucleotides
early postmortem detection of exudative pork meat based on nucleotide content 413
nutraceutical
soy protein fortification affects sensory, chemical, and microbiological properties of dairy yogurts 1244
nutria
microbial flora associated with Louisiana processed frozen and fresh nutria (*Myocastor coypus*) carcasses 1041
oats
effect of process conditions on the physical and sensory properties of extruded oat–corn puff 1253
off-flavor
formation of 2-pentyl pyridine during processing of soybean protein isolates as affected by ph 852
off-odor
production of volatile compounds from irradiated oil emulsion containing amino acids or proteins 612
ohmic heating
an ultrasonic method for assessing the residence time distribution of particulate foods during ohmic heating ... 1180
oil, coconut
supplementation of energy-restricted diets with coconut oil improves nitrogen balance without elevation of blood cholesterol levels 1066
oil, colza
oil absorption during frying of frozen parfried potatoes 476
oil, palm
sensory and physical properties of peanut butter treated with palm oil and hydrogenated vegetable oil to prevent oil separation 173
oil quality retention
quality evaluation of edible film-coated chicken strips and frying oils 1087
oil uptake
oil absorption during frying of frozen parfried potatoes 476
decreasing oil uptake of doughnuts during deep-fat frying using curdlan ... 883
okara
modification of proteins from soymilk residue (okara) by trypsin 781
oleic acid
physical and molecular properties of egg-white lipid films 860
comparison of cheeses made from milk having normal and high oleic fatty acid compositions 920
olfactory analysis
headspace evaluation of methanethiol and dimethyl trisulfide in aqueous solutions of soy-protein isolates 819
olfactory component
flavor manipulation can enhance the impression of fat in some foods 909
olive oil
aluminum content in foods and beverages consumed in the Spanish diet 206
calcium absorption in rats consuming olive oil or sunflower oil unused or used in frying 892
olives
optimization of simulated ripe olive darkening in presence of manganese 254
changes in the amino acid composition of green olive brine due to fermentation by pure culture of bacteria 1022
onion pectic acid
molecular composition of onion pectic acid 1160
on-line
nondestructive assessment of lipid oxidation in minced poultry meat by autofluorescence spectroscopy 87
ophthalaldehyde
HPLC determination of amino acids in musts and port wine using OPA/FMOC derivatives 1130
optimization
optimizing apple juice extraction in multiple presses 461

improved peanut flour for a reduced-fat peanut butter product 854
ORAC
anthocyanins, phenolics, and antioxidant capacity of processed lowbush blueberry products 390
orange juice
influence of carotenoids and pulps on the color modification of blood orange juice 458
volatiles from unpasteurized and excessively heated orange juice analyzed with solid phase microextraction and gc-olfactometry 800
effects of pulsed electric fields on microorganisms in orange juice using electric field strengths of 30 and 50 kv/cm.. 984
effects of pulsed electric fields on the activities of microorganisms and pectin methyl esterase in orange juice 1359
oregano
headspace volatiles and physical characteristics of vacuum-microwave, air, and freeze-dried oregano (*Lippia berlandieri schauer*) 926
organic phase biocatalysis
synthesis of low molecular weight flavor esters using plant seedling lipases in organic media 295
osme
volatiles from unpasteurized and excessively heated orange juice analyzed with solid phase microextraction and gc-olfactometry 800
osmotic dehydration
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple 838
evaluation of mass transfer mechanisms during osmotic treatment of plant materials 1016
influence of blanching-osmotic dehydration treatments on volatile fraction of strawberries 1107
ovalbumin
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins 564
oxalic acid
rhubarb juice as a natural antibrowning agent 1288
oxidation
hydrolytic and oxidative changes in the lipids of chicken breast and thigh muscles during refrigerated storage 9
degradation of lycopene, α-carotene, and β-carotene during lipid peroxidation 71
optimization of simulated ripe olive darkening in presence of manganese 254
flavor and oxidative stability of peanut–sesame–soy blends 901
lipid changes of freeze-dried spinach by various kinds of oxidation 1290
oxidative stability and sensory attributes of prerigor cooked beef steak 1382
oxidative stability
measuring oxidative stability of beef muscles obtained from animals supplemented with vitamin E using conventional and derivative spectrophotometry 1138
oxysterols
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
ozonated water
influence of ozone, hydrogen peroxide, or salt on microbial profile, tbars and color of channel catfish fillets 1210
ozone
inactivation kinetics of foodborne spoilage and pathogenic bacteria by ozone 521
Pacific whiting
porcine plasma proteins as a surimi protease inhibitor: effects on actomyosin gelation 607
packaging
diffusion of acetic and propionic acids from chitosan-based antimicrobial packaging films 768
packaging film
relative effects of ingredients on cake staling based on an accelerated shelf-life test 937
packaging, modified atmosphere
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
quality of shredded carrots as affected by packaging film and storage temperature 726
modified atmosphere packaging of pomegranate 1112
PAL
changes in the quality of fresh-cut jicama in relation to storage temperatures and controlled atmospheres 1238
particle shape
effect of cloud particle characteristics on the viscosity of cloudy apple juice .. 641
particulate foods
an ultrasonic method for assessing the residence time distribution of particulate foods during ohmic heating ... 1180
pasting
electrical conductance study of fluid motion and heat transport during starch gelatinization 144
pastry
pastry lift and croissant volume as affected by microbial transglutaminase 312
PCR
detection of residues of genetically modified soybeans in breaded fried turkey cutlets 604
rapid PCR-RFLP method for the identification of marine fish fillets (seabass, seabream, umbrine, and dentex) .1315
pea fiber
sensory, shear, and cooking properties of lower-fat beef patties made with inner pea fiber 805
peach
flow characterization of peach products during extrusion 471
peanut
flavor and oxidative stability of peanut–sesame–soy blends 901
peanut butter
sensory and physical properties of peanut butter treated with palm oil and hydrogenated vegetable oil to prevent oil separation 173
improved peanut flour for a reduced-fat peanut butter product 854
pears
extending shelf life of fresh-cut pears 181
quality changes in fresh-cut pear slices as affected by cultivar, ripeness stage, fruit size, and storage regime 541
pectin methyl esterase
effects of pulsed electric fields on the activities of microorganisms and pectin methyl esterase in orange juice 1359
pectinase
molecular composition of onion pectic acid 1160
Pediococcus acidilactici
destruction of *Yersinia enterocolitica* by *Lactobacillus sake* and *Pediococcus acidilactici* during low-temperature fermentation of Turkish dry sausage (sucuk) 876
pentosan
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes 808
peptide profile
ripening profiles of goat cheese produced from milk treated with high pressure– 833
peracid
antimicrobial efficacy of a peroxyacetic/octanoic acid mixture in fresh-cut-vegetable process waters 1376
permeability
apple wraps: a novel method to improve the quality and extend the shelf life of fresh-cut apples 480
water vapor permeability and solubility of films from hydrolyzed whey protein 700
quality of shredded carrots as affected by packaging film and storage temperature 726
peroxidase
purification and kinetic characterization of peroxidase from tomato cultivated under different salinity conditions .. 15
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes 808
impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
peroxidase, glutathione
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat 211
peroxidase isoenzymes
purification and kinetic characterization of peroxidase from tomato cultivated under different salinity conditions .. 15
pesticide
organochlorines, organophosphates, and pyrethroids in channel catfish, rainbow trout, and red swamp crayfish from aquaculture facilities 231
pH
anthocyanins, phenolics, and antioxidant capacity of processed lowbush blueberry products 390
effect of temperature of milk acidification on rennet gel properties 630
degradation kinetics of (-)-epigallocatechin gallate as a function of pH and dissolved oxygen in a liquid model system 753
formation of 2-pentyl pyridine during processing of soybean protein isolates as affected by ph 852
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
pH affects the thermal inactivation parameters of r-phycoerythrin from *Porphyra yezoensis* 1046
degradation kinetics of chlorophyll in peas as a function of pH 1296
pH muscle
postmortem changes in black skipjack muscle during storage in ice 774
phase contrast microscopy

protein extraction from chicken myofibrils irrigated with various polyphosphate and NaCl solutions ... 96
phenolic-protein interaction
interaction of low molecular weight phenolics with proteins (BSA) ... 617
phenolics
antioxidant activity of nontocopherol hazelnut (*Corylus* spp.) phenolics ... 276
bioactive properties of wild blueberry fruits ... 352
phosphates
^{1}h NMR studies of water in chicken breast marinated with different phosphates ... 575
phyllosilicates
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases ... 826
physicochemical characterization
reactions of chlorogenic acid with lysozyme: physicochemical characterization and proteolytic digestion of the derivatives ... 1091
correlation between physicochemical characteristics and binding capacities of chitosan products ... 1134
phytosterol
phytosterol enrichment of rice bran oil by a supercritical carbon dioxide fractionation technique ... 1395
pig plasma
purification and characterization of low molecular weight kininogen from pig plasma ... 81
pineapple
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple ... 838
pinking
ability of various dairy proteins to reduce pink color development in cooked ground turkey breast ... 417
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations ... 421
pitting
modified atmosphere packaging of pomegranate ... 1112
plant lipases
synthesis of low molecular weight flavor esters using plant seedling lipases in organic media ... 295
plant phenolic substances
reactions of chlorogenic acid with lysozyme: physicochemical characterization and proteolytic digestion of the derivatives ... 1091
plasma protein
plasma protein and soy fiber content effect on bologna sausage properties as influenced by fat level ... 281
inhibition of thermal degradation of mackerel surimi by pig plasma protein and l-kininogen ... 1124
plasticization
plasticizing–antiplasticizing effects of water on physical properties of tapioca starch films in the glassy state ... 445
plum
water sorption enthalpy-entropy compensation based on isotherms of plum skin and pulp ... 680
pollack
microbial transglutaminase affects gel properties of golden threadfin-bream and pollack surimi ... 694
polyamines
exogenous polyamines and gibberellic acid effects on peach (*Prunus persica* l.) storability improvement ... 288
changes in biogenic amine content of tokaj grapes, wines, and aszu-wines 1142
polymers
pH induced aggregation and weak gel formation of whey protein polymers 139
polyols
salt-free miso fermentation using ethanol, sugars, and polyols ... 918
polyphenoloxidase
kinetic study of antibrowning agents and pressure inactivation of avocado polyphenoloxidase ... 823
polyphenolics
changes in anthocyanins and polyphenolics during juice processing of highbush blueberries (*Vaccinium corymbosum* l.) ... 357
polyphenols
in vitro antioxidant activity of black tea and Mediterranean herb infusions toward iron under simulated gastrointestinal conditions ... 1060
polyphosphate
protein extraction from chicken myofibrils irrigated with various polyphosphate and NaCl solutions ... 96
polypropylene
modified atmosphere packaging of pomegranate ... 1112
pomegranate
modified atmosphere packaging of pomegranate ... 1112
population models
intrepretation of and extraction of useful information from irregular fluctuating industrial microbial counts ... 740
porcine plasma proteins
porcine plasma proteins as a surimi protease inhibitor: effects on actomyosin gelation ... 607
pork
physicochemical and sensory characteristics of fish gelatin ... 194
early postmortem detection of exudative pork meat based on nucleotide content 413
effects of *Eubacterium coprostanoligenes* and *Lactobacillus* on pH, lipid content, and cholesterol of fermented pork and mutton sausage-type mixes ... 903
pork quality
variations in rate of water loss as related to different types of post-rigor porcine musculature during storage ... 865
pork sausage
volatiles and oxidative changes in irradiated pork sausage with different fatty acid composition and tocopherol content ... 270
porosity
pore structure of coffee beans affected by roasting conditions ... 452
methodology to obtain true thermal conductivity of low porosity food powders 962
postharvest
nondestructive methods to evaluate maturity level of oranges ... 365
potatoes
oil absorption during frying of frozen parfried potatoes ... 476
growth and production of enterotoxin A by *Staphylococcus aureus* on "home-style" french fries ... 913
the use of fractional conversion technique to investigate the effects of testing parameters on texture degradation kinetics ... 968
evaluation of mass transfer mechanisms during osmotic treatment of plant materials ... 1016
poultry
nondestructive assessment of lipid oxidation in minced poultry meat by autofluorescence spectroscopy ... 87
ability of various dairy proteins to reduce pink color development in cooked ground turkey breast ... 417
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations ... 421
thermal inactivation kinetics of *Salmonella* and *Listeria* in ground chicken breast meat and liquid medium ... 706
PPO
changes in the quality of fresh-cut jicama in relation to storage temperatures and controlled atmospheres ... 1238
predictive microbiology
modeling the growth/no-growth interface of *Zygosaccharomyces bailii* in mango puree ... 516
premature browning
factors affecting premature browning during cooking of store-purchased ground beef ... 585
color and heat denaturation of myoglobin forms in ground beef ... 847
prerigor
oxidative stability and sensory attributes of prerigor cooked beef steak 1382
press
optimizing apple juice extraction in multiple presses ... 461
pressure
combined pressure–temperature inactivation of alkaline phosphatase in bovine milk: a kinetic study ... 155
pressure shift freezing
comparison of air-blast and pressure shift freezing on Norway lobster quality ... 329
pretreatment
effect of cottage cheese whey pretreatment and 2-phase crossflow microfiltration/ultrafiltration on permeate flux and composition ... 334
probe
methodology to obtain true thermal conductivity of low porosity food powders 962
probiotics
the binding of H_2O_2-generated Fe(III) to *Bifidobacterium thermophilum* depends on the method of its production 1028
process design
statistical variability of heat penetration parameters in relation to process design ... 685
process flavoring
development of a meat-like process flavoring from soybean-based enzyme-hydrolyzed vegetable protein (E-HVP) 1220
processing
triose phosphate isomerase as an endogenous time-temperature integrator to verify adequacy of roast beef processing ... 236
changes in anthocyanins and polyphenolics during juice processing of highbush blueberries (*Vaccinium corymbosum* l.) ... 357
formation of 2-pentyl pyridine during processing of soybean protein isolates as affected by ph ... 852
propionic
diffusion of acetic and propionic acids from chitosan-based antimicrobial

packaging films 768
protease
gelation characteristics of paddlefish (*Polyodon spathula*) surimi under different heating conditions 394
protease inhibitor
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
protection
pressure-induced denaturation of muscle proteins and its prevention by sugars and polyols 818
protein
functional properties of milk-egg mixtures 787
protein additives
effect of hydration time and salt addition on gelation properties of major protein additives 1338
protein aggregation
thermostability of hen egg yolk granules: contribution of native structure of granules 581
protein degradation
purification and characterization of low molecular weight kininogen from pig plasma 81
protein denaturation
physicochemical properties of frozen red hake (*Urophycis chuss*) mince as affected by cryoprotective ingredients ..1117
protein extraction
postmortem biochemical and functional characteristic of monterey sardine muscle stored at 0 °C 40
protein extraction from chicken myofibrils irrigated with various polyphosphate and NaCl solutions 96
protein films
physical and molecular properties of egg-white lipid films 860
protein functionality
effect of high pressure processing at different temperatures on protein functionality of porcine blood plasma— 486
modification of proteins from soymilk residue (okara) by trypsin 781
formulation protocol and dicationic salts affect protein functionality of model system beef batters 1151
protein oxidation
chemical, physical, and gel-forming properties of oxidized myofibrils and whey- and soy-protein isolates 811
protein patterns
tofu yield and textural properties from three soybean cultivars as affected by ratios of 7S and 11S proteins 763
protein solubility
texture and chemical characteristics of soy protein meat analog extruded at high moisture 264
proteinase
purification and characterization of proteinase from Atlantic menhaden muscle 772
proteinase inhibitor
purification and characterization of low molecular weight kininogen from pig plasma 81
porcine plasma proteins as a surimi protease inhibitor: effects on actomyosin gelation 607
proteins
covalent crosslinking in heated protein systems 221
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
proteolysis
characterization and functional properties of rice bran proteins modified by commercial exoproteases and endoproteases 305
gelation characteristics of paddlefish (*Polyodon spathula*) surimi under different heating conditions 394
high hydrostatic pressure for accelerating ripening of goat's milk cheese: proteolysis and texture 636
contribution of *Lactococcus lactis* ssp. lactis IFPL 359 and *Lactobacillus casei* ssp. casei IFPL 731 to the proteolysis of caprine curd slurries 711
ripening profiles of goat cheese produced from milk treated with high pressure– 833
partial purification and characterization of chinook salmon (*Oncorhynchus tshawytscha*) calpains and an evaluation of their role in postmortem proteolysis 1318
proteolysis, postmortem
postmortem changes in mule duck muscle marinated in red wine 906
PSP toxins
thermal degradation of partially purified paralytic shellfish poison toxins at different times, temperatures, and pH 948
PTM
production of hydrogen peroxide by *Lactobacillus delbrueckii* ssp. lactis as influenced by media used for propagation of cells 1033
pulsed electric fields
effects of pulsed electric fields on microorganisms in orange juice using electric field strengths of 30 and 50 kv/cm .. 984
effects of pulsed electric fields on the activities of microorganisms and pectin methyl esterase in orange juice 1359
purge
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
purification
purification of glycomacropeptide from caseinate hydrolysate by gel chromatography and treatment with acidic solution 588
purification method
technical approach to simplify the purification method and characterization of microbial transglutaminase produced from *Streptovercillium ladakanum* 76
quality
changes in selected chemical quality characteristics of channel catfish frame mince during chill and frozen storage 24
microbiological and color quality changes of channel catfish frame mince during chilled and frozen storage 151
early postmortem detection of exudative pork meat based on nucleotide content 413
quality comparison of hydroponic tomatoes (*Lycopersicon esculentum*) ripened on and off vine 545
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722
quality index method developed for raw gilthead seabream (*Sparus aurata*) 1202
quality assurance
intrepretation of and extraction of useful information from irregular fluctuating industrial microbial counts 740
quorum sensing
inoculum size of *Clostridium botulinum* 56A spores influences time-to-detection and percent growth-positive samples 1369
R-phycoerythrin
pH affects the thermal inactivation parameters of R-phycoerythrin from *Porphyra yezoensis* 1046
radiolytic degradation
production of volatile compounds from irradiated oil emulsion containing amino acids or proteins 612
raffinose
sorption isotherm and calorimetric behavior of amorphous/crystalline raffinose-water systems 646
rancidity
stability of washed frozen mince from channel catfish frames 1083
rats
liver injury-preventive effect of tea theanine in rats 30
classification and antihypertensive activity of angiotensin i-converting enzyme inhibitory peptides derived from food proteins 564
calcium absorption in rats consuming olive oil or sunflower oil unused or used in frying 892
ready-to-eat cereals
extrusion cooking process for amaranth (*Amaranthus caudatus l.*) 1009
reduced-fat
influences of gums, soy protein isolate, and heating temperatures on reduced-fat meat batters in a model system .. 48
physical characteristics and microstructure of reduced-fat frankfurters as affected by salt and emulsified fats stabilized with nonmeat proteins 123
improved peanut flour for a reduced-fat peanut butter product 854
reducing agent
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
refining process
effects of fractionation and the refining process of lard on cholesterol removal by β-cyclodextrin 622
rehydration
rehydration kinetics of high-pressure pretreated and osmotically dehydrated pineapple 838
relaxation
study of caking in powdered foods using nuclear magnetic resonance spectroscopy 134
relaxation time distribution
relaxation time spectrum of hydrogels by CONTIN analysis 374
rennet milk gel
effect of temperature of milk acidification on rennet gel properties 630
residence time distribution
an ultrasonic method for assessing the residence time distribution of particulate foods during ohmic heating ... 1180
residue
organochlorines, organophosphates, and pyrethroids in channel catfish, rainbow trout, and red swamp crayfish from aquaculture facilities 231
resistance
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
respiration
changes in the quality of fresh-cut jica-

ma in relation to storage temperatures and controlled atmospheres 1238
response surface methodology
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations 421
development of a meat-like process flavoring from soybean-based enzyme-hydrolyzed vegetable protein (E-HVP) 1220
retort
headspace volatiles of sockeye and pink salmon as affected by retort process 34
statistical variability of heat penetration parameters in relation to process design 685
RFLP
rapid PCR-RFLP method for the identification of marine fish fillets (seabass, seabream, umbrine, and dentex) . 1315
rhamnogalacturonan
molecular composition of onion pectic acid 1160
rheology
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
effect of temperature of milk acidification on rennet gel properties 630
influence of NaCl and $CaCl_2$ on cold-set gelation of heat-denatured whey protein 801
isostrength comparison of large-strain (fracture) rheological properties of egg white and whey protein gels 893
rheological characterization of rice flour-based batters 1194
effects of cation properties on sol-gel transition and gel properties of κ-carrageenan 1332
rhubarb juice
rhubarb juice as a natural antibrowning agent 1288
ribose
development of a meat-like process flavoring from soybean-based enzyme-hydrolyzed vegetable protein (E-HVP) 1220
rice
in vitro digestion/caco-2 cell culture model to determine optimal ascorbic acid to FE ratio in rice cereal 925
rice bran
characterization and functional properties of rice bran proteins modified by commercial exoproteases and endoproteases 305
rice bran oil
phytosterol enrichment of rice bran oil by a supercritical carbon dioxide fractionation technique 1395
rice cultivars
differences in hollow volumes in cooked rice grains with various amylose contents as determined by NMR micro imaging 408
rice flour
rheological characterization of rice flour-based batters 1194
ripening
nondestructive methods to evaluate maturity level of oranges 365
quality comparison of hydroponic tomatoes (*Lycopersicon esculentum*) ripened on and off vine 545
high hydrostatic pressure for accelerating ripening of goat's milk cheese: proteolysis and texture 636
improvement of the sensory properties of dry fermented sausages by the superficial inoculation and/or the addition of intracellular extracts of *Mucor racemosus* 731
ripening profiles of goat cheese produced from milk treated with high pressure– 833
risk assessment
intrepretation of and extraction of useful information from irregular fluctuating industrial microbial counts 740
a quantitative process model for *Salmonella enteritidis* in shell eggs 864
roast beef
triose phosphate isomerase as an endogenous time-temperature integrator to verify adequacy of roast beef processing 236
roasting
pore structure of coffee beans affected by roasting conditions 452
rodent
identification of rodent filth exhibits 1391
salad dressing
ultrasonic spectroscopy study of salad dressings 507
salinity
purification and kinetic characterization of peroxidase from tomato cultivated under different salinity conditions .. 15
salmon
headspace volatiles of sockeye and pink salmon as affected by retort process 34
biological characteristics affect the quality of farmed atlantic salmon and smoked muscle 53
residues of ethoxyquin and ethoxyquin dimer in ocean-farmed salmonids determined by high-pressure liquid chromatography 1312
partial purification and characterization of chinook salmon (*Oncorhynchus tshawytscha*) calpains and an evaluation of their role in postmortem proteolysis 1318
salmon, chinook
optimum postmortem chilled storage temperature for summer and winter acclimated, rested, chinook salmon (*Oncorhynchus tshawytscha*) white muscle 750
Salmonella typhimurium
survival and growth of *Vibrio cholerae O1, Salmonella typhi, and Escherichia coli* O157:H7 in alfalfa sprout 162
induction of resistance of *Salmonella typhimurium* to environmental stresses by exposure to short-chain fatty acids 1037
short chain fatty acids alter HEP-2 cell association and invasion by stationary growth phase *Salmonella typhimurium* 1206
salmonellae
prevalence of salmonellae on beef products at butcheries and their antibiotic resistance profiles 880
salt
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
influence of ozone, hydrogen peroxide, or salt on microbial profile, tbars and color of channel catfish fillets 1210
effect of hydration time and salt addition on gelation properties of major protein additives 1338
salt effect
effects of cation properties on sol-gel transition and gel properties of κ-carrageenan 1332
salt-vinegar curing
texture changes associated with insolubilization of sarcoplasmic proteins during salt-vinegar curing of fish 804
salts
effects of salts on the thermal reversibility of starch and hsian-tsao (*Mesona procumbens hemsl*) leaf gum mixed system 954
sanitizers
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
sarcoplasmic proteins
texture changes associated with insolubilization of sarcoplasmic proteins during salt-vinegar curing of fish 804
sausages
effects of *Eubacterium coprostanoligenes* and *Lactobacillus* on pH, lipid content, and cholesterol of fermented pork and mutton sausage-type mixes 903
scanning
pore structure of coffee beans affected by roasting conditions 452
scanning electron microscopy
viscoelastic, thermal, and microstructural characterization of soy protein isolate films 672
seafood
aluminum content in foods and beverages consumed in the Spanish diet 206
a new approach for the determination of fish freshness by electrochemical impedance spectroscopy 780
seedling
synthesis of low molecular weight flavor esters using plant seedling lipases in organic media 295
sensory
thawing prior to cooking affects sensory, shear force, and cooking properties of beef patties 2
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
sensory, shear, and cooking properties of lower-fat beef patties made with inner pea fiber 805
predicting the cutting time of coagulating milk for cheese production using a heated thermistor 879
effect of aspartame and fat on sweetness perception in yogurt 1056
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
effect of process conditions on the physical and sensory properties of extruded oat–corn puff 1253
instrumental and expert assessment of mahon cheese texture 1170
sensory analysis
debittering of a tryptic digest of bovine β-casein using porcine kidney general aminopeptidase and x-prolydipeptidyl aminopeptidase from *Lactococcus lactis* ssp. cremoris AM2 1145
quality index method developed for raw gilthead seabream (*Sparus aurata*) 1202
sensory evaluation
headspace volatiles of sockeye and pink salmon as affected by retort process 34
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
texture assessment of French cheese 168
postmortem changes in black skipjack muscle during storage in ice 774

sensory flavor/taste attribute
evaluation of konjac blends and soy protein isolate as fat replacements in low-fat bologna 756
sensory properties
sensory and physical properties of peanut butter treated with palm oil and hydrogenated vegetable oil to prevent oil separation 173
extending shelf life of fresh-cut pears 181
improvement of the sensory properties of dry fermented sausages by the superficial inoculation and/or the addition of intracellular extracts of *Mucor racemosus* 731
serine proteinase
proteolytic degradation of tropical tilapia surimi 129
sesame
flavor and oxidative stability of peanut–sesame–soy blends 901
-SH groups
fish myosin aggregation as affected by freezing and initial physical state—556
shear-force
oxidative stability and sensory attributes of prerigor cooked beef steak 1382
shear thinning
viscosity and textural attributes of reduced-fat peanut pastes 849
shelf life
changes in selected chemical quality characteristics of channel catfish frame mince during chill and frozen storage 24
sensory and physical properties of peanut butter treated with palm oil and hydrogenated vegetable oil to prevent oil separation 173
extending shelf life of fresh-cut pears 181
effects of low-dose gamma irradiation and conventional treatments on shelf life and quality characteristics of diced celery 1070
color stability of edible coatings during prolonged storage 1166
apple cultivar and maturity affect haze-active protein and haze-active polyphenol concentrations in juice 1386
shellac
color stability of edible coatings during prolonged storage 1166
short-chain fatty acids
induction of resistance of *Salmonella typhimurium* to environmental stresses by exposure to short-chain fatty acids 1037
short chain fatty acids alter HEP-2 cell association and invasion by stationary growth phase *Salmonella typhimurium* 1206
simulation
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978
solar drying of bananas: mathematical model, laboratory simulation, and field data compared 990
skim milk powder
gelation and water binding properties of transglutaminase-treated skim milk powder 200
snacks
extrusion cooking process for amaranth (*Amaranthus caudatus l.*) 1009
sodium
the effects of antioxidants on browning and on degradation products caused by dehydroascorbic acid 20
sodium chloride
drying kinetics of hydrated and gelatinized corn starches in the presence of sucrose and sodium chloride 115
solar
solar drying of bananas: mathematical model, laboratory simulation, and field data compared 990
sol-gel transition
effects of cation properties on sol-gel transition and gel properties of κ-carrageenan 1332
solid phase microextraction
volatiles from unpasteurized and excessively heated orange juice analyzed with solid phase microextraction and gc-olfactometry 800
solubility
acylation and solubility of casein precipitated by carbon dioxide 227
water vapor permeability and solubility of films from hydrolyzed whey protein 700
solubilization
involvement of disulfide bonds in bovine β-lactoglobulin b gels set thermally at various pH 384
sorbate
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
soy
enzymatic hydrolysis and synthesis of soy protein to improve its amino acid composition and functional properties 246
chemical, physical, and gel-forming properties of oxidized myofibrils and whey- and soy-protein isolates 811
flavor and oxidative stability of peanut–sesame–soy blends 901
soy protein fortification affects sensory, chemical, and microbiological properties of dairy yogurts 1244
soy fiber
plasma protein and soy fiber content effect on bologna sausage properties as influenced by fat level 281
soy protein
texture and chemical characteristics of soy protein meat analog extruded at high moisture 264
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study 997
soy protein concentrate
evaluation of genistin and genistein contents in soybean varieties and soy protein concentrate prepared with 3 basic methods 399
soy protein fortification affects sensory, chemical, and microbiological properties of dairy yogurts 1244
soy protein isolate
influences of gums, soy protein isolate, and heating temperatures on reduced-fat meat batters in a model system .. 48
lycopene stability in tomato powders . 67
tensile properties of soy protein isolate films produced by a thermal compaction technique 668
evaluation of konjac blends and soy protein isolate as fat replacements in low-fat bologna 756
headspace evaluation of methanethiol and dimethyl trisulfide in aqueous solutions of soy-protein isolates 819
formation of 2-pentyl pyridine during processing of soybean protein isolates as affected by ph 852
precursors for formation of 2-pentyl pyridine in processing of soybean protein isolates 1155
soybean cultivar
tofu yield and textural properties from three soybean cultivars as affected by ratios of 7S and 11S proteins 763
soybean protein isolate
soybeans
detection of residues of genetically modified soybeans in breaded fried turkey cutlets 604
soymilk
production of kefir from soymilk with or without added glucose, lactose, or sucrose 716
modification of proteins from soymilk residue (okara) by trypsin 781
specific heat change
the contribution of water to the specific heat change at the glass-to-rubber transition of the ternary system BSA-water-NaCl 1187
spectrophotometry
measuring oxidative stability of beef muscles obtained from animals supplemented with vitamin E using conventional and derivative spectrophotometry 1138
spectroscopy
nondestructive assessment of lipid oxidation in minced poultry meat by autofluorescence spectroscopy 87
spectroscopy, electrochemical impedance
a new approach for the determination of fish freshness by electrochemical impedance spectroscopy 780
spectroscopy, NIR
differentiation of beef and kangaroo meat by visible/near-infrared reflectance spectroscopy 814
spectroscopy, ultrasonic
ultrasonic spectroscopy study of salad dressings 507
spices
analyses of glycolipids in clove, red pepper, and nutmeg by high-performance liquid chromatography 931
spinach lipid
lipid changes of freeze-dried spinach by various kinds of oxidation 1290
spoilage
high oxygen and high carbon dioxide modified atmospheres for shelf-life extension of minimally processed carrots 61
spores
nisin-resistant (nis^r) *Listeria monocytogenes* and nis^r *Clostridium botulinum* are not resistant to common food preservatives 888
inoculum size of *Clostridium botulinum* 56A spores influences time-to-detection and percent growth-positive samples 1369
spreadability
viscosity and textural attributes of reduced-fat peanut pastes 849
squid
immunochemical and immunohistochemical identification of a minor collagen in raw muscles of decapod mollusks 570
stability
thiamin stability in solids as affected by the glass transition 498
stability of retinyl palmitate during cooking and storage in rice fortified with Ultra Rice™ fortification technology ... 915
the effect of caramel coloring on the multiple degradation pathways of aspar-

tame 1100
apple cultivar and maturity affect haze-active protein and haze-active polyphenol concentrations in juice 1386
stabilization
high hydrostatic pressure treatments for beer stabilization 974
staling
relative effects of ingredients on cake staling based on an accelerated shelf-life test 937
Staphylococcus aureus
growth and production of enterotoxin A by *Staphylococcus aureus* on "home-style" french fries 913
starch films
plasticizing–antiplasticizing effects of water on physical properties of tapioca starch films in the glassy state 445
lipid addition to improve barrier properties of edible starch-based films and coatings 941
starch gelatinization
electrical conductance study of fluid motion and heat transport during starch gelatinization 144
MRI observation and mathematical model simulation of water migration in wheat flour dough during boiling . 1343
starch retrogradation
starch retrogradation and texture of cooked milled rice during storage ... 828
starch suspensions
viscoelastic changes of rice starch suspensions during gelatinization 215
starvation
biological characteristics affect the quality of farmed atlantic salmon and smoked muscle 53
stationary phase
short chain fatty acids alter HEP-2 cell association and invasion by stationary growth phase *Salmonella typhimurium* 1206
statistical variability
statistical variability of heat penetration parameters in relation to process design 685
stickiness
improved peanut flour for a reduced-fat peanut butter product 854
storage
quality changes in fresh-cut pear slices as affected by cultivar, ripeness stage, fruit size, and storage regime 541
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722
optimum postmortem chilled storage temperature for summer and winter acclimated, rested, chinook salmon (*Oncorhynchus tshawytscha*) white muscle 750
degradation of vitamin A palmitate in corn flakes during storage 1216
textural changes in mushrooms (*Agaricus bisporus*) associated with tissue ultrastructure and composition 1404
storage, refrigerated
hydrolytic and oxidative changes in the lipids of chicken breast and thigh muscles during refrigerated storage 9
storage stability
lycopene stability in tomato powders . 67
starch retrogradation and texture of cooked milled rice during storage ... 828
storage temperature
quality of shredded carrots as affected by packaging film and storage temperature 726
strain
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722
strawberries
influence of blanching-osmotic dehydration treatments on volatile fraction of strawberries 1107
stress
biological characteristics affect the quality of farmed atlantic salmon and smoked muscle 53
stress relaxation
relaxation time spectrum of hydrogels by CONTIN analysis 374
stress resistance
induction of resistance of *Salmonella typhimurium* to environmental stresses by exposure to short-chain fatty acids 1037
structure
structure and composition of mushrooms as affected by hydrogen peroxide wash 889
structured lipids
fractionation of chicken fat triacylglycerols: synthesis of structured lipids with immobilized lipases 826
sucrose
drying kinetics of hydrated and gelatinized corn starches in the presence of sucrose and sodium chloride 115
salt-free miso fermentation using ethanol, sugars, and polyols 918
sulfhydryls
physical and molecular properties of egg-white lipid films 860
antioxidant activity of whey in a salmon oil emulsion 1325
sunflower oil
calcium absorption in rats consuming olive oil or sunflower oil unused or used in frying 892
supercritical CO_2
Impact of supercritical carbon dioxide and high pressure on lipoxygenase and peroxidase activity 1284
deodorization of fish sauce by continuous-flow extraction with microbubbles of supercritical carbon dioxide 1349
phytosterol enrichment of rice bran oil by a supercritical carbon dioxide fractionation technique 1395
surface properties
the gloss of edible coatings as affected by surfactants, lipids, relative humidity, and time 658
surfactant
the gloss of edible coatings as affected by surfactants, lipids, relative humidity, and time 658
surimi
changes in selected chemical quality characteristics of channel catfish frame mince during chill and frozen storage 24
proteolytic degradation of tropical tilapia surimi 129
combination effects of microbial transglutaminase, reducing agent, and protease inhibitor on the quality of hairtail surimi 241
gelation characteristics of paddlefish (*Polyodon spathula*) surimi under different heating conditions 394
chemical and functional properties of oxidatively modified beef heart surimi stored at 2 °C 428
microbial transglutaminase affects gel properties of golden threadfin-bream and pollack surimi 694
functionality changes in oxidatively/antioxidatively washed beef-heart surimi during frozen storage 796
inhibition of thermal degradation of mackerel surimi by pig plasma protein and l-kininogen 1124
quality improvement of mackerel surimi with NADPH-sulfite reductase from *Escherichia coli* 1400
sweetness
effect of aspartame and fat on sweetness perception in yogurt 1056
synbiotic
growth and viability of commercial *Bifidobacterium* ssp. in skim milk containing oligosaccharides and inulin 884
synthesis
synthesis of low molecular weight flavor esters using plant seedling lipases in organic media 295
TBARS
nondestructive assessment of lipid oxidation in minced poultry meat by autofluorescence spectroscopy 87
dietary iron and copper removal does not improve cholesterol and lipid oxidative stability of raw and cooked broiler meat— 211
TEM
protein denaturation and structural damage during high-pressure-shift freezing of porcine and bovine muscle 1002
temperature
combined pressure–temperature inactivation of alkaline phosphatase in bovine milk: a kinetic study 155
effect of temperature of milk acidification on rennet gel properties 630
optimum postmortem chilled storage temperature for summer and winter acclimated, rested, chinook salmon (*Oncorhynchus tshawytscha*) white muscle 750
temperature of treatments
effect of high pressure processing at different temperatures on protein functionality of porcine blood plasma— 486
tenderness
thawing prior to cooking affects sensory, shear force, and cooking properties of beef patties 2
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786
tensile strength
tensile properties of soy protein isolate films produced by a thermal compaction technique 668
testing parameters
the use of fractional conversion technique to investigate the effects of testing parameters on texture degradation kinetics 968
texture
texture and chemical characteristics of soy protein meat analog extruded at high moisture 264
comparison of air-blast and pressure shift freezing on Norway lobster quality 329
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491
effects of low-dose gamma irradiation on the shelf life and quality characteristics of cut romaine lettuce packaged under modified atmosphere 549
gelling properties of whey proteins after enzymic fat hydrolysis 561
high hydrostatic pressure for accelerating ripening of goat's milk cheese: proteolysis and texture 636

tofu yield and textural properties from three soybean cultivars as affected by ratios of 7S and 11S proteins 763
irradiation in contrast to thermal processing of pepperoni for control of pathogens: effects on quality indicators 1260
starch retrogradation and texture of cooked milled rice during storage ... 828
isostrength comparison of large-strain (fracture) rheological properties of egg white and whey protein gels 893
relative effects of ingredients on cake staling based on an accelerated shelf-life test 937
instrumental and expert assessment of mahon cheese texture 1170
changes in the quality of fresh-cut jicama in relation to storage temperatures and controlled atmospheres 1238
textural changes in mushrooms (*Agaricus bisporus*) associated with tissue ultrastructure and composition 1404

texture degradation
the use of fractional conversion technique to investigate the effects of testing parameters on texture degradation kinetics

texture profile analysis
evaluation of konjac blends and soy protein isolate as fat replacements in low-fat bologna 756

thawing
thawing prior to cooking affects sensory, shear force, and cooking properties of beef patties 2
changes in temperature, texture, and structure of konnyaku (konjac glucomannan gel) during high-pressure-freezing 491

theanine
liver injury-preventive effect of tea theanine in rats 30

thermal compression
tensile properties of soy protein isolate films produced by a thermal compaction technique 668

thermal conductivity
methodology to obtain true thermal conductivity of low porosity food powders 962

thermal gel
involvement of disulfide bonds in bovine β-lactoglobulin b gels set thermally at various pH 384

thermal inactivation
pH affects the thermal inactivation parameters of R-phycoerythrin from *Porphyra yezoensis* 1046

thermal processing
irradiation in contrast to thermal processing of pepperoni for control of pathogens: effects on quality indicators 1260

thermal stability
thermal stability of bovine milk immunoglobulin g (igg) and the effect of added thermal protectants on the stability 188

thermal characterization
viscoelastic, thermal, and microstructural characterization of soy protein isolate films 672

thermistor
predicting the cutting time of coagulating milk for cheese production using a heated thermistor 879

thermodynamic study
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study 997

thiamin
thiamin stability in solids as affected by the glass transition 498

threadfin-bream
microbial transglutaminase affects gel properties of golden threadfin-bream and pollack surimi 694

tilapia
proteolytic degradation of tropical tilapia surimi 129

time-temperature integrator
triose phosphate isomerase as an endogenous time-temperature integrator to verify adequacy of roast beef processing 236

titin
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786

tofu
tofu yield and textural properties from three soybean cultivars as affected by ratios of 7S and 11S proteins 763

tomatine
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897

tomato
purification and kinetic characterization of peroxidase from tomato cultivated under different salinity conditions .. 15
a fluorescent lectin test for mold in raw tomato juice 346
quality comparison of hydroponic tomatoes (*Lycopersicon esculentum*) ripened on and off vine 545
cultivar, maturity, and heat treatment on lycopene content in tomatoes 791

tomato aroma
tomato flavor and aroma quality as affected by storage temperature 1228

tomato powder
lycopene stability in tomato powders . 67

tomatoes, green
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897

tomatoes, red
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897

transglutaminase
gelation and water binding properties of transglutaminase-treated skim milk powder 200
pastry lift and croissant volume as affected by microbial transglutaminase 312

transport phenomena
use of artificial neural network to predict temperature, moisture, and fat in slab-shaped foods with edible coatings during deep-fat frying 978

treatment
frozen mushrooms quality as affected by strain, flush, treatment before freezing, and time of storage 722

triglycerides
feeding tomatoes to hamsters reduces their plasma low-density lipoprotein cholesterol and triglycerides 897

triose phosphate isomerase
triose phosphate isomerase as an endogenous time-temperature integrator to verify adequacy of roast beef processing 236

triploids
biological characteristics affect the quality of farmed atlantic salmon and smoked muscle 53

troponin-T
low-voltage electrical stimulation effects on proteolysis and lamb tenderness 786

trypsin
purification and characterization of proteinase from Atlantic menhaden muscle 772
modification of proteins from soymilk residue (okara) by trypsin 781

turbidity
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
influence of NaCl and $CaCl_2$ on cold-set gelation of heat-denatured whey protein 801
apple cultivar and maturity affect haze-active protein and haze-active polyphenol concentrations in juice 1386

Turkish dry sausage
biogenic amines in Turkish sausages (sucuks) 764
destruction of *Yersinia enterocolitica* by *Lactobacillus sake* and *Pediococcus acidilactici* during low-temperature fermentation of Turkish dry sausage (sucuk) 876

two-phase flow
effect of cottage cheese whey pretreatment and 2-phase crossflow microfiltration/ultrafiltration on permeate flux and composition 334

Ultra Rice
stability of retinyl palmitate during cooking and storage in rice fortified with Ultra Rice™ fortification technology ... 915

ultrafiltration
effect of cottage cheese whey pretreatment and 2-phase crossflow microfiltration/ultrafiltration on permeate flux and composition 334

ultrasonic power
predicting lethal effect of ultrasonic waves under pressure treatments on *Listeria monocytogenes* ATCC 15313 by power measurements 663

ultrasound
predicting lethal effect of ultrasonic waves under pressure treatments on *Listeria monocytogenes* ATCC 15313 by power measurements 663
an ultrasonic method for assessing the residence time distribution of particulate foods during ohmic heating ... 1180

unfrozen water
the contribution of water to the specific heat change at the glass-to-rubber transition of the ternary system BSA-water-NaCl 1187

Vaccinium angustifolium
bioactive properties of wild blueberry fruits 352
anthocyanins, phenolics, and antioxidant capacity of processed lowbush blueberry products 390

vacuum-microwave
headspace volatiles and physical characteristics of vacuum-microwave, air, and freeze-dried oregano (*Lippia berlandieri schauer*) 926

vane method
measurement of the yield stress of protein foams by vane rheometry 110

vanillin
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study 997

vegetable microstructure
preservation of microstructure in peach and mango during high-pressure-shift freezing 466

vegetable, fresh-cut

antimicrobial efficacy of a peroxyacetic/octanoic acid mixture in fresh-cut-vegetable process waters 1376
vegetable microflora
reduction of microflora of whole pickling cucumbers by blanching 1354
vegetables
aluminum content in foods and beverages consumed in the Spanish diet 206
Vibrio cholerae
survival and growth of *Vibrio cholerae O1, Salmonella typhi, and Escherichia coli* O157:H7 in alfalfa sprout 162
viscoelastic
viscoelastic changes of rice starch suspensions during gelatinization 215
viscoelastic, thermal, and microstructural characterization of soy protein isolate films 672
viscosity
flow characterization of peach products during extrusion 471
effect of cloud particle characteristics on the viscosity of cloudy apple juice .. 641
viscosity and textural attributes of reduced-fat peanut pastes 849
effects of salts on the thermal reversibility of starch and hsian-tsao (*Mesona procumbens hemsl*) leaf gum mixed system 954
rheological characterization of rice flour-based batters 1194
vitamins
stability of retinyl palmitate during cooking and storage in rice fortified with Ultra Rice™ fortification technology ... 915
stability of vitamins A, E, and B complex in infant milks claimed to have equal final composition in liquid and powdered form 1052
measuring oxidative stability of beef muscles obtained from animals supplemented with vitamin E using conventional and derivative spectrophotometry 1138
degradation of vitamin A palmitate in corn flakes during storage 1216
volatiles
headspace volatiles of sockeye and pink salmon as affected by retort process 34
volatiles and oxidative changes in irradiated pork sausage with different fatty acid composition and tocopherol content 270
production of volatile compounds from irradiated oil emulsion containing amino acids or proteins 612
headspace volatiles and physical characteristics of vacuum-microwave, air, and freeze-dried oregano (*Lippia berlandieri schauer*) 926
influence of blanching-osmotic dehydration treatments on volatile fraction of strawberries 1107
deodorization of fish sauce by continuous-flow extraction with microbubbles of supercritical carbon dioxide 1349
washing
factors limiting the efficacy of hydrogen peroxide washes for decontamination of apples containing *C. botulinum* .. 529
structure and composition of mushrooms as affected by hydrogen peroxide wash 889
water
plasticizing–antiplasticizing effects of water on physical properties of tapioca starch films in the glassy state 445
^{1}h NMR studies of water in chicken breast marinated with different phosphates 575
water activity
thiamin stability in solids as affected by the glass transition 498
moisture diffusion and desorption isotherms for banana 651
mathematical model for prediction of glass transition temperature of fruit powders 842
variations in rate of water loss as related to different types of post-rigor porcine musculature during storage 865
water demand
MRI observation and mathematical model simulation of water migration in wheat flour dough during boiling . 1343
water dispersion
electrical conductance study of fluid motion and heat transport during starch gelatinization 144
water holding
textural, water holding, and sensory properties of low-fat pork bologna with normal or waxy starch hull-less barley 101
gelation and water binding properties of transglutaminase-treated skim milk powder 200
water permeability
relative effects of ingredients on cake staling based on an accelerated shelf-life test 937
water re-use
chlorine generation and disinfection by electroflotation 834
water vapor
lipid addition to improve barrier properties of edible starch-based films and coatings 941
weight gain
supplementation of energy-restricted diets with coconut oil improves nitrogen balance without elevation of blood cholesterol levels 1066
wheat gluten
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes 808
whey
optimizing preparation conditions for heat-denatured whey protein solutions to be used as cold-gelling ingredients 259
ability of various dairy proteins to reduce pink color development in cooked ground turkey breast 417
response surface methodology for reduction of pinking in cooked turkey breast mince by various dairy protein combinations 421
chemical, physical, and gel-forming properties of oxidized myofibrils and whey- and soy-protein isolates 811
antioxidant activity of whey in a salmon oil emulsion 1325
whey proteins
pH induced aggregation and weak gel formation of whey protein polymers 139
thermal aggregation of whey proteins in model solutions as affected by casein/whey protein ratios 776
influence of NaCl and $CaCl_2$ on cold-set gelation of heat-denatured whey protein 801
isostrength comparison of large-strain (fracture) rheological properties of egg white and whey protein gels 893
the emulsifying properties of commercial milk protein products in simple oil-in-water emulsions and in a model food system 934
interaction of vanillin with soy and dairy proteins in aqueous model systems: a thermodynamic study 997
color stability of edible coatings during prolonged storage 1166
white muscle
optimum postmortem chilled storage temperature for summer and winter acclimated, rested, chinook salmon (*Oncorhynchus tshawytscha*) white muscle 750
wine
changes in biogenic amine content of tokaj grapes, wines, and aszu-wines 1142
wine, port
HPLC determination of amino acids in musts and port wine using OPA/FMOC derivatives 1130
WPC
gelling properties of whey proteins after enzymic fat hydrolysis 561
WVTR
water vapor transmission rates and sorption behavior of chitosan films 1175
xylanase
baking performance, rheology, and chemical composition of wheat dough and gluten affected by xylanase and oxidative enzymes 808
yellowing kinetics
color stability of edible coatings during prolonged storage 1166
Yersinia enterocolitica
destruction of *Yersinia enterocolitica* by *Lactobacillus sake* and *Pediococcus acidilactici* during low-temperature fermentation of Turkish dry sausage (sucuk) 876
yield stress
measurement of the yield stress of protein foams by vane rheometry 110
flow characterization of peach products during extrusion 471
yogurt
effect of aspartame and fat on sweetness perception in yogurt 1056
soy protein fortification affects sensory, chemical, and microbiological properties of dairy yogurts 1244
z-value
thermal stability of bovine milk immunoglobulin g (igg) and the effect of added thermal protectants on the stability 188
pH affects the thermal inactivation parameters of R-phycoerythrin from *Porphyra yezoensis* 1046
Zygosaccharomyces bailii
modeling the growth/no-growth interface of *Zygosaccharomyces bailii* in mango puree 516
